World Economy **Needs More Time to** Grow, Baker Says

By Carl Gewirtz PARIS --- U.S. Treasury Secreary James A. Baker 3d pleaded Wednesday for critics to give gov-eroments the time needed to implenent their promises to set the world on a track for more balanced conomic growth

Mr. Baker was speaking after a major meeting of industrial countries here produced no new initiaives on the growth issue.

Following the two-day annual necting of government ministers of the Organization for Economic Co-operation and Development, Mr. Baker specifically referred to the agreement in Paris in February by six of the major industrialized countries to stabilize exchange rates and promote growth in West Germany and Japan.

He said the impact from the "full implementation" of this agreement struck by finance ministers at their meeting at the Louvre, and amplified in early April at a subsequent

Barbie Quits Court, Will **Boycott Trial**

By Julian Nundy al Herald Tribin LYON --- Declaring himself "an Hegal hostage," Klaus Barbie said Wednesday he would boycott further proceedings in his trial for mines against humanity and then eft the courtroom to return to his

The decision of the 73-year-old former SS captain, whose trial opened Monday, means that witesses will not confront him directly with testimony that he tortured hem during the Nazi occupation of Barbic, who was expelled from Bolivia to France in 1983 to stand trial said he considered the exputsion illegal because he had obtained Bolivian citizenship.

Under French law; a trial can proceed without the defendant. The judge can order the accused to be brought to the courtroom by force, but it appeared unlikely in Barbie's case. His departure on the third day of

the trial brought an angry reaction from the prosecutor, and lawyers for civil plaintiffs.

meeting in Washington, is enough to "do the job."

At this week's meeting of the 24member OECD, faster growth in Japan and West Germany and rapid reduction of the U.S. budget deficit were again the key elements discussed for reducing the huge trade deficit of the United States, cutting the surpluses of these two other countries, and restoring sta-bility to foreign exchange rates. Mr. Baker said evidence that

these policies are working should become evident no later than September, taking into account that the U.S. fiscal year begins Oct. 1 and the time needed for Japan to first win approval of its fiscal budget before it can submit plans for a supplementary budget which will call for additional spending of 5 trillion yen (\$35 billion).

All together, the planned actions would lift world economic growth to about 2.5 to 3 percent, a respectable rate of growth, he said, for the fifth year of expansion — the sec-oud-longest since the end of World War II. "We ought not be down in the mouth" about such a growth rate, the Treasury secretary said. However, the promise that po-licy in the three major industrial-ized countries will lift growth from the 2.25 percent or less forecast by the OECD secretariat last month met with considerable skepticism

from the smaller countries in the organization of nations from North America, Western Europe and the Pacific. Mr. Baker cautioned that it was unrealistic to expect new commitments to emerge every time there is an international meeting, which currently occurs at about about

three-week intervals in the run-up to the June summit in Venice of the heads of state of the seven leading Bolkiah industrialized countries.

"We ought to be pleased with sustained growth without infla-tion" at this late stage of the economic cycle, he said. The U.S. merchandise trade deficit --- which last year hit \$170 bil-. lion, an imbalance that is firing protectionist sentiment in Con-entry in Huntering and experi-ent to decime by some \$15 billion

Foreign Minister Shimon Peres of Israel, after failing to obtain the necessary backing to dissolve the coalition government.

Peace Plan Stalls **As Peres Fails on Necessary Votes**

By Glenn Frankel Washington Post Service JERUSALEM — Israel's government was thrown into a deadlock on Wednesday after Foreign Minister Shimon Peres, lacking the votes to bring down the coalition if it did not support plans for an international peace conference, declined to submit the proposal to the. policy-making "inner cabinet."

It was a victory for Prime Minister Yitzhak Shamir, who opposes the conference, and a serious blow for Mr. Peres, who has been a strong supporter of the proposal as a means of paving the way for di-rect talks herween Israel and a Jordanian delegation that would included moderate Palestinians.

Mr. Peres, confident that he had enough votes to break up the 32month-old coaliuon government, had declared that he would call for new elections if the 10-man inner

cahinet refused to endorse the pro-posal. But Wednesday he discovered that he lacked the necessary votes in the Knesset, or parliament. Of the several small ultraorihodox religious parties holding the balance of power in the 120-member Knessel, Mr. Peres had failed to woo the four-seat Sephardi Torah Guardians to his side. That left him at least two votes short of the 61 he needed.

Mr. Peres then postponed his trip to the United States, to begin Thursday, and began meeting with cahinet ministers of his Labor bloc and other lawmakers in an effort 10 break loose the votes he needs.

Meanwhile, the government had been immobilized, with Mr. Peres and his more dovish Labor Alignment insisting that it should be dissolved and the international conference proposal submitted to the nation through parliamentary elections. Mr. Shamir and his rightist Likud bloc argued that the plan has been rejected by the govern-

ment and should be abandoned. The proposal also has touebed off a round of vitriolic rhetoric between Mr. Peres and Mr. Shamir. in contrast to the general civility that marked the first two and one half years of the coalition government.

On Tuesday, Mr. Shamir called the plan "a perverse and criminal attempt" that he blamed on Mr. Peres's "lust for power," adding that "every remnant and vestige of this plan must be swept off the

Mr. Shamir has said the proposal would result in returning all the occupied West Bank and East Jerusalem to Arab rule and, eventually, in the establishment of an indepen-

Mr. Peres, in turn, has said that Mr. Shamir and his supporters were resorting to "demagogy" and that "they want to restore the ha-tred, the incitement, the character assassibilition against me." Mr. Peres has vehemently denied he plans to talk to the PLO or to allow a Palestinian state,

Mr. Peres refused to put the proposal to a vote of the inner cabinet. evenly divided between Labor and Likud, hecause, he said, it was certain to split five to five on the issue. He said later that "I still have a full mandate to continue" pressing for the conference.

He said that one of the principles upon which Israel's "national unigovernment was formed was living in Geneva and was married the advancement of the peace proto a Swiss physician. On Tuesday, cess, adding that "if you cannot officials in Washington identified continue with the peace process, bonesty as well as responsibility The judge would not name the calls upon all of us to turn to the hank in which the husinessman had people and ask them to decide." Mr. Shamir's spokesman, Avi Pazner, said the prime minister did

State Union Leads Strike In Croatia

The Associated Press

BELGRADE - Meat plant workers have walked off the job in Zagreb, the Politika newspaper said Wednesday, in the first known report of a strike organized by a union since Yugoslavia became Communist in 1945.

There are no legal provisions for work stoppages in Yugoslavia. While wildcat strikes for more pay or improved working conditions have increased recently, state-su-

Work stoppages bave increased since Feb. 26, when the govern-ment enacted legislation tying most wages to productivity and reducing some paychecks by up to 40 percent in an effort to master economic problems. Politika said the meat plant

strike, involving 1,200 workers of a production unit, began Tuesday, The employees say they are owed 73 days of back pay, the daily said. The report also said that 140 workers of a furniture plant in Senj. about 75 miles (120 kilometers) southwest of Zagreb, walked off the joh Tuesday to hack up pay demands.

Coal miners at Labin, 150 miles southwest of Zagreb, returned to work Monday, after reaching a compromise agreement over raises and changes by management. The strike, which began April 8, was one of the longest in recent history. According to official statistics, there have been more than 380 spontaneous strikes this year, involving 50,000 workers.

Pressing economic problems include an annual inflation rate of nearly 100 percent, a hard currency debt of about \$19 billion and living standards that have fallen by more than a third since 1980.

Japanese Assaults Hallowed U.S. Sports Mark

By Clyde Haberman New York Times Service

TAKARAZUKA, Japan - On June 6 in Hiroshima - assuming rainouts, injuries or other imponderables do not interfere - a Japanese baseball player named Sachio Kinugasa will step onto the field and

That evening he will play in his 2,130th consecutive game, equaling what had seemed an unmatchable record set almost five decades ago by Lon Gehrig of On an unusually warm spring afternoon Mr. Kien the New York Yankees.

The last time Mr. Kinngasa missed an appearance was Oct. 18, 1970, when most Americans did not think much about Japan and trade talks were a topic for the

Gehrig's mark is about to fail, and the Japanese are games left." eagerly ticking off the days.

ing major festivities for the night the record is tied. But Iron Man Kinugasa, as he is called, has chosen to stay above the bullabaloo. The way be sees it, be is not chasing Lou Gehrig's record. It is chasing him.

"If we have a game, I want to play, that's all." he said. "I've forced myself for a long time to play despite slumps and injuries. The record itself is not the goal.

gasa sat in a hotel room, waiting for the team bus that would take him from this suburb of Osaka to a nearby stadium for Consecutive Game No. 2,097. a night contest against the Hanshin Tigers. He was talking

nuch about Japan and trade tails were a topie for the sports section, not the business pages. To have a Japanese about to break another hal-lowed American baseball record is a source of unbri-dled delight for sports fans here. Ten years ago, they cheered as Sadaharu Oh sur-passed Babe Ruth and then Hank Aaron on his way to a griterial organized to the rank of t passed have not a the state of the set total of 868 home runs. Now Low early to be watching it because there were too many

agerly ticking off the days. In Hiroshima, where Kinugasa has played for 23 At the age of 40, the Japanese Lou Gehrig is as lean and solidly built as a rookie. And he is a man given to seasons with the adored local team, the Carp, street- easy smiles and easy conversation, something that cars carry his picture and club executives are prepar- cannot be said about many Japanese ball players.

When he joined the Carp in 1965, Kinugasa was considered a showboat, a flashy hig spender who, former teammates recall, took his bonus money and bought a Cadillac. Actually, it was a Ford Galaxy. Kinugasa protested, but the point, he agreed, is well taken. He was a hard-drinking hell-raiser.

That was then. For many years since, as his record attests, he has been a rock of consistency and, as such, the sarariman's hero.

A sarariman - the Japanese word is taken straight from English, salaryman — is Japan's Average Joe. He is the guy who puts on a blue sint every morning, rides the train to work for an hour and a half, puts in 10 or 12 bours, drinks late into the night with colleagues, then heads home for a few hours of sleep so that he can start all over again the next day.

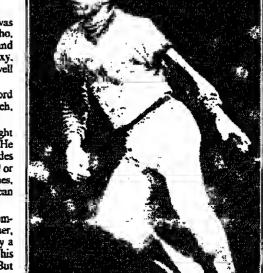

Like the sarariman, Mr. Kinugasa is there, as promised, every day. He shrugs off hruises and bad weather, rocky seasons and tough pitchers. A serious injury a year ago, caused when a wayward pitch smashed his left shoulder hlade, almost threatened his record. But the Carp third baseman was hack to pinch-hit the next night, and has been slogging away ever since. That sort of doggedness is much admired in Japan.

See BASEBALL, Page 2

Sachio Kinugasa on the playing field.

WORLD BRIEFS

Cracks Down UN Experts Say Iraq Used Poison Gas UNITED NATIONS, New York (UPI) - A UN team of experts said

UNITED NATIONS, New York (UPI) — A UN team of experts said Wednesday that Iraq has made "repeated use" of poison gas against Iranian troops and civilians in the Gulf war but the panel could not confirm assertions that Iran is also using chemical weapons. "There has been repeated use of chemical weapons against Iranian forces by Iraqi forces, employing aerial bombs and very probably rockets," the experts reported. "The chemical agents used are mustard gas (yperite) and probably, on some occasions, nerve agents. A new dimension is that civilians in Iran have also been injured by chemical weapons."

The four experts, sent by Secretary-General Javier Perez de Cuellar on 'a swift crackdown less than 48 their third investigative mission in just over three years, visited both Iran hours after taking over control of and Iraq. Iraq has contended that Iranian forces have recently used poison gas. Iran has denied the allegation and said that Iraci forces -either by mistake or intentionally - have used poison gas against their own troops and civilians.

ISLIP, New York (UPI) - A barge loaded with rotting garbage that has been turned away from ports in five states and three countries is welcome to return to New York for burial but the barge operator, Lowell Harrelson, has refused the offer.

He said taking the trash to Islip would require costly overland transport from a port in New York City to the dump. The barge, dubbed the "Flying Trashman," left New York on March 22 in search of a dumping ground for 3.186 tons of refuse. On Tuesday it was reported off the coast of Georgia and moving north,

. Frank Jones, the Islip town supervisor, said the Long Island communi-ty can accommodate another three years of garbage in its landfill and is accepting commercial clients.

AIDS to Be Topic at Venice Verges had a clear field to introduce whatever arguments he chose

New York Times Service

PARIS -- Plans to coordinate the search for a cure for AIDS will be among the issues discussed at the seven-nation economic conference next month in Venice, top officials at a meeting of the Organization for Economic Cooperation and Development said here.

"We will try to discuss the problem because public opinion is very worried," said Giulio Andreotti, foreign minister in Italy's caretaker povernment, which will be the host to the Venice conference June 8-

A Reagan administration official said of AIDS, "I see it becomin as important as terrorism and drogs have been at other summits." Many of the finance and foreign ministers who will be in Venice are in Paris for the meeting of the OECD, which is made up of the world's 24 main industrial countries.

Official deliberations are held to economic issues, but other topics have emerged. In comments outside their meeting room, officials said that AIDS, or acquired immune deficiency syndrome, would be widely discussed in Venice.

A member of the U.S. delegation in Paris, which is led by Treasury Secretary James A. Baker 3d, said the spread of AIDS, especially in some African countries, was becoming a matter of political and economic policy, not solely one of health.

At the OECD meeting, the Japanese stated that their objective, in addition to stronger growth, is a rapid increase in imports and a further improvement in access to f Japan's markets of foreign goods and services. They accepted in the final communique wording that was contested in early drafts.

The West Germans, however, were less forthcoming. The secretariat's proposal that growth of domestic demand, and particularly private investment, must be "sustained," or even "strengthened," and exceed substantially the growth of potential output were both dropped in the final version.

The only concession they made to doubts that the government's targets will be met was a watered down statement that "should there be a serious risk to the sustained expansion of domestic demand, especially private investment, the medium-term strategy for growth and higher employment would be adsusted as a consequence."

Martin Bangomann, West Germany's economics minister who chaired the meeting, said at a press conference that a shortfall in a singie three-month period would not signal a need for change. The country experienced a decline in growth in the first quarter.

But Mr. Bangemann said that there would be an improvement in this quarter and continuing in the second-half.

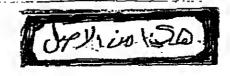

He said his aim was to achieve a 2 percent rate of growth this year. However, last month's OECD forecast put the figure at 1.5 percent.

Mr. Baker said that he was encouraged by the Japanese and West Germao commitments to spur growth, but urged the Germans "to do as much as they can as soon as they can" as "we feel they have more room." -----

Gulf: Parallel Courses

Union are working in tandem, or at least in parallel, in a Third World hot spot. This rare spectacle is unfolding in the Gulf, where free navigation, where Iraq is the worse both countries have offered to protect the offender. But it leaves them free to support spectacle is unfolding in the Gulf, where shipping of Kuwait, an ally of Iraq, against Iranian attack. The effort does not replace gion," in President Reagan's words. the two powers' long-term rivalry in a strate-gic region. On the contrary, the various pro-posals to escort and defend tankers and other cargo vessels are a form of that competition. But it is a form that holds some promise to move the seemingly interminable war in the Gulf toward an end.

Page 4

The Soviet and American approaches arise from a peculiar fact of the war, Iran and Iraq, unable to effect a decision in battle on land, have increasingly sought to choke each other off at sea. But sea lanes are in international waters where other countries can assert an interest in free navigation and where this superpower involvement can be undertaken more easily than in a land war --- though not without risk.

Iraq, aware that the Gulf is Iran's only outlet (Irsq can export oil by pipeline), has shot up more Iranian shipping than Iran has shot up ships headed to or from Iraq and Iraq's Gulf allies. That makes it hard

Suddenly the United States and the Soviet for the United States and other countries that oppose an Iranian victory in the war to base policy exclusively on a regard for "the self-defense of our friends in the re-

reach for a larger diplomatic role in the Arab-Israeli dispute. On both matters, Washington is properly wary of secing Mos-cow penetrate traditional Western preserves.

Io respect to the Gulf, however, Americans note that in making their move, the Soviets are serving Western interests -- free navigation, assuring the flow of oil to the West. Further, Moscow is acting on the American premise that it is vital to check Iran's invasion of Iraq. Like the Americans, the Soviets value Iran strategically but are put off by the Khomeini regime politically and ideologically. To hear the Tehran regime decrying Soviets and Americans as similarly unwetcome interlopers in the Gulf is to become aware of the limited but important interest the superpowers share here.

- THE WASHINGTON POST.

What Sort of Tax Rise?

The budget resolutions of both the U.S. House and Senate call for an \$18 billioo tax increase next year. If that is what the tax committees are instructed to produce, how should they do is? The best way would be through the income tax. A first step, as House Speaker Jun Wright has suggested, would be to defer next year's scheduled final cut in the top rate to 28 percent from 33 percent. The top rate already was low-ered from 70 percent when President Reagan took office. Yet the income tax is still the most progressive tax the government has, and it is so large that \$18 billion could be raised with only minor adjustment.

The problem, of course, is that the president is proved of the rate cuts, which were part of last year's bargain on tax reform. He says he will veto any rate increase, and there is little disposition in Congress to dispute him. The fairest, most efficient kind of tax three; but it is a brave politician who will increase has pretty well been ruled out; the committees are reduced to second-bests.

By default, they are thus foraging among the excise taxes. The virtue is that it is in society's interest to discourage consumption of the three leading items on which excise taxes are levied - gasoline, alcohol and tobacco. The defect is that excise taxes are regressive and there is oot much revenue to be had. The total now collected from all excise taxes is about \$33 billion a year.

The gasoline tax, which at 9 cents a gallon raises \$9 billion a year, is the largest. A further dime a gallon would produce about half the revenue that the budget resolution is likely to require in the first year (it

may need more thereafter). The House Ways and Means Committee chairman, Dan Rostenkowski, prefers this alternative - prices still would be lower than several years ago -- but Westerners, whose constituents often must drive long distances, are opposed. A broader energy tax, on all oil, for example, would spread the burden more evenly. A third variation is an oil import fee. This is popular in oil-producing states because it would give domestic producers shelter to raise their prices, but it is resisted in the import-dependent East. Our sense is that the gasoline tax is the cleanest of these.

The alcohol taxes now produce about \$6 llion a year. Most of that comes from hard liquor, whose alcohol content is taxed much more heavily than the alcohol in beer or wine. One alternative would be to equal-ize the alcohol-adjusted taxes among the propose to raise the beer tax. One argument for raising these taxes is to put a penalty on drinking, with its attendant costs. The same is true for cigarettes, on which the tax of 16 cents a pack produces \$4.5 billion a year. Estimators think that, while deterring young smokers particularly, a doubling of the tax would yield \$3 billion annually.

Administration officials have occasionally coyly indicated that, if there has to be a tax increase, an increase in excise taxes and the "sin" taxes would be preferable. In this administration, a tax on consumption beats a tax on income every time. But that may be all the political system can now produce. - THE WASHINGTON POST.

Judging Meese, Again

attorney general under investigation by a special prosecutor. The case of the Wedtech cation in his association with investors in the

It is no longer remarkable to find the U.S. or give him a believable clean bill of health. That is why Mr. Meese, confident of vindi-

N EW YORK -- The sudden departure of Gary Hart from the campaign has, strangely enough, probably not altered the Democratic nomination or the presidential outcome. Before his exit, Mr. Hart was clearly his party's front-runner, inst at War Bendler Campa Data has he d just as Vice President George Bush has had a handy lead in the Republican sweepstakes. In both cases, the polls have placed them around the 50 percent mark and found their competitors strug-

percent mark and found their competitors strug-gling to get into the double digits. Only Senator Bob Dole in the Republican Party has seemed to be close enough to being a serious contender. Yet the margin of their standing was more apparent than real. In political terms, their support has been "soft" — broader than it was deep. Indeed, the perceived vulnerability of both Mr. Bush and Mr. Hart had induced a bevy of other candidates on both sides into the field. The races, especially in the Democratic Party, were wide open

even before Mr. Hart dropped out. Why is this? Usually such large margins by front-runners would discourage new entrants. The reason, I think, is a general misconception about modern American politics, Informed opinion still thinks in terms of party, as if the Democratic and Republican parties possessed a general, if some-what vague, coherence; as if people still held to inherited or acquired allegiances; as if the parties, even as they jostle for uncommitted voters, embodied significant differences. Actually the words "Democratic" and "Repub-

lican" have lost their historic meanings and no longer lay claim to traditional ties and presumed loyalties. Everywhere, voters examine candidates without regard to labels or enrollment. If they like what they see, as in the case of President Reagan, they are happy to disregard party lines (he himself was once a Democrat); if they find him wanting, like Mr. Hart, the rejection is quick and decisive. The fact is that America no longer has a two-

party system but rather a no-party system. The adependents in both parties now outnumber predictable party voters. Some polls indicate that a -majority no longer consider themselves Democrats or Republicans, and tend to measure candidates by . their freedom from partisan commitment.

They also reject leaders of their own constituen ... cies who try to influence them. Labor minons By Richard C. Wade

er that half their membership abandoned them for Ronald Reagan. In the same way, black voters disregarded the choice of most of their spokesmen and went in droves for the Reverend Jesse Jackson in the Democratic primaries.

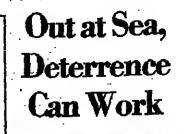

Eurollecs of both parties jump ship regularly. Even popular elected officials are quick to point out that their support is hardly ever transferable to other candidates. And millions of citizens have dropped out of politics altogether; barely half even bother to vote in presidential elections. This rampant independence is a central fact of contemporary politics. And its sources are not hard

Today's voters are notoriously unpredictable. Candidates will. have to deal with great volatility.

to discover. An almost continuous prosperity since World War II has produced a generation that does not need politics for jobs or success. Television has replaced parties as a mediator between candidates and crizers, withering the grassroots organizations that once nourished political activity. In addition, a string of public acandals beginning with Watergate has bred a corrosive cymicism about the entire democratic process. The result is a skeptical electorate that musts its own judgment more than the established sources of political authority - parties, elected officials or civic leaders.

The case of the Republican Party is instructive. A sitting vice president, George Bush, is chal-lenged by the majority leader of his own party, Bob Dole. A conservative representative, Jack Kemp; and a former senator, Paul Lazelt; isy conflicting claims to the legacy of a popular, if weakened; president, And a preacher, Pat Robertson, almost embryabel the former senator in a Michieum and ambushed the front number in a Michigan presidential cancus. The conservative captivity of the Republican Party that began with Barry Goldwa-ter's candidacy in 1964 has disintegrated into argu-

ment over who is the "real conservative."

By Christoph Bertram

HAMBURG-The hagging over how to respond to Moscow's latest proposals on missiles is disturbing, and not only for the disarray it shows up in the Atlantic alliance. For it also underscores the fact that the West is merely reacting when it should be taking the initiative to define how security and deterrence in Enrope can be maintained.

Europe's security and deterrence now depend on the presence of large conventional forces, including about 320,000 American troops, coupled with U.S. nuclear weapons. Some of the latter are bound to be withdrawn as a result of the emerging U.S.-Sovi-et agreement on intermediate-range er agreement on internetitate ange-nuclear weapons. Others will remain, in particular the almost 5,000 "battle-field" nuclear weapons, for use by artillery, aircraft and ships. There are also a few hundred Brit-ich and Emerican surgest

ish and French nuclear warhcads, some U.S. strategic missiles allocated to the North Atlantic Treaty Organization's supreme European com-mander, and a score of U.S. sealaunched cruise missiles.

But once the intermediate-range missiles are removed, the rest is largely of doubtful determines value.

Take the battlefield weapons, which have been poured into Europe almost mindlessly to reasone nervous allies. Most use delivery systems of very short range. In a crisis, they would give a scarcely credible signal to a potential aggressor: that the West not only would use these weapons despite the attendant risks, but would release them early enough to make any differ-ence in a European conflict. U.S. strategic forces are also doubt-

ful deterrents. They are simply too big a bang. To use them would be the last step to worldwide nuclear war. They could scarcely put the fear of defeat into an aggressor with limited military objectives in Western Europe. ÷.,

. . . .

.....

So the European governments' fear about being left with these systems is understandable. But the attempt to hold onto the remaining systems is misplaced. To block the Soviet proposal to ban all missiles of a range of 300 to 600 miles (about 500 to 1,000 kilometers) from Europe is a rearguard action that the West cannot win. It also locks Western governments into short-term reactions when long-term thinking is needed.

NATO governments should accept the Soviet challenge and put deter-rence on a sounder basis. Apart from sufficient conventional forces, that re-quires a small number of credible nuclear weapons. They would have to be stationed well to the rear instead of being at the front lines (where they could be overrun or create pressure on political authorities for premature firing); they would be mobile, not in vulnerable fixed positions where they would invite a Soviet pre-emptive attack; and they would be linked to detering conflict, not precipitating it.

Corporation marks the third time an independent counsel, appointed by a court under the Ethics in Government Act, has scrutipized Edwin Meese's conduct - twice at his own request. But remarkably, Mr. Meese continues to denounce as unconstitutional the law that allows such inquiries.

He argues that the independent counsel law invades the powers of the executive branch by creating a prosecutor oot subject to dismissal by the president. That is the essence of the post-Watergate reform that prevents something like Richard Nixon's 1973 firing of the prosecutor Archibald Cox.

When a high-ranking government official comes under suspicion, existing federal machinery often cannot do a credible investigation. In the Wedtech case, the public cannot be expected to believe that the Justice Denartment would prosecute its boss vigorously

scandal-ridden business, asked to transfe that investigation to an independent counsel. Such a counsel is already looking into the Wedtech dealings of Lyn Nofziger, Mr. Meese's longtime political associate.

An independent counsel requested by Mr. Meese three years ago made his confirmation as attorney general possible by clearing him of criminal wrongdoing in the doling out of White House jobs to creditors and friends. The current investigation by Lawrence Walsh, the independent counsel in the Irancontra case, could benefit Mr. Meese, whose own tumbering inquiry raised suspicions. The attorney general, whose demeanor

ought to be a model for law enforcement sensitivity, would do well to monitor his own behavior better --- and to stop bad-mouthing the very law that can clear him.

- THE NEW YORK TIMES.

Porpoises and Permits

Each year Japan sends a fleet to U.S. waters to fish for salmon. In the process, porpoises become entangled and die in ovon nets that are invisible to their sonar. A permit that allows this "incidental" catch is up for renewal. The Commerce Department should allow the Japanese some iceway despite the objections of conservationists. The porpoises are in no danger of extinction, and denying the permit would run against other American interests.

Conservationists argue that not enough is known about the porpoise populations to issue a permit. They point out that the fleet operates in a calving area, and that each pregnant or lactating female killed equals two deaths. The Japanese want to renew the permit at 5.500 a year, or at the very least 4,000. An administrative law judge's conclusion that the right oumber is 1,750 has left oo one happy. The Japanese threaten to scuttle other fishing agreements and con-servationists talk of lawsuits, should Commerce adopt the recommendation.

The Marine Mammal Protection Act seeks to reduce incidental fishing mortality to insignificant levels. It also provides for kill permits during commercial fishing so long as

100 M (100 - 100 -

species are not depleted. Thus the Japanese have been allowed to kill up to 5.500 Dall's porpoises a year since 1981. They have never reached that limit. Last year the number was near 1,500; in 1985 it was about 2,700. Judge Hugh Dolan would reduce the quota to

roughly the five-year average. The Japanese want a higher comber to cushion against normal fluctuations in the mortality rate; otherwise the fleet could be shut down. Some conservationists would like just that, since drift nets are destructive to marine mammals and sea birds. But denying the permit would rob the United States of leverage in future orgotiations and invite the Japanese to renege on agreements like one that restricts salmon fishing in the Bering Sea. It also would discourage their research on less harmful nets.

The Commerce Department should issue a permit of less than 5,500 but at least 1,750. If the permit were issued for two years instead of five, any hardship on the porpoises or the fishermen would affect only two seasons. Protecting porpoise populations and catching fish need not he mutually exclusive.

No Fiscal Locomotive Can Pull a Deficit-Heavy Train

By Hobart Rowen

DARIS -- In talks here this week, Treasury Secretary James Baker has tried to persoade his European opposite numbers that the United States is delivering on the pledge to reduce its huge budget deficit.

It is essential that he do so: With considerable logic, his counterparts argue that if Mr. Baker is so insistent on creating a fiscal "locomotive" in Western Europe and in Japan to stimulate global growth, the promised American part of the bargain must be sharp deficit reduction.

That is supposed to be the essential cooperative method for reducing the huge trade imbalances that plague the world comomy: the deficit in the U.S. account, and the surpluses in Western Europe and Japan.

Yet the view in Europe on the locomotive theory is sharply divided. Within the international research agency for major industrial nations, the OECD, there is a strong consensus. It is that the economies of West Germany, Japan and other nations that can expand should do so, not just to help lower the U.S. trade deficit, but in the interest of their own living stan-

dards and to foster world trade. too early in their effort to force the The OECD position is that if the dollar lower — a judgment in which United States and its major partners, many financial analysis concur. In any event, the shape of this and deliver on them, the trade imbal-ances will continue indefinitely. But some others here are dubious strategy for the Venice session. The scenario, as laid out, still calls for that a more aggressive pumping up of the European and Japanese como-budgetary retrenchment in the Unit-mics can do much to boost global ed States and expansion elsewhere. To Europeans here, Mr. Baker is not convincing on the American role. growth. A paper prepared by Europe-ans for a recent forum sponsored by

If Jordan Wants Peace, It Must Act

WASHINGTON - An Arab plea for peace with Israel is most heartily to be welcomed, espe-cially when it comes from Jordan's ambassador to Washington, Mo-hamed Kamal ("A Jordanian Appeal: American Jews Can Help," IHT, April 20). But the authenticity of his ples must be questioned.

He insists for instance, that Israel compromise for the sake of peace. but he has oothing to say about any possible Arab compromise. Yet, in this matter, Israel needs no prodding. It has proved by deeds, in its peace treaty with Egypt, how farreaching are the concessions it is prepared to make for peace.

The ambassador mentions Israel's military occupation of Judea-Samaria (the "West Bank") since 1967, but he is strangely silent about Jordan's military occupation of that area for 19 years before 1967. During that time, the area was constantly used as a launching pad for armed incur-sions into Israel In fact, Israel has tragically experienced many decades of protracted war, terrorism and hateful incitement systematically unleashed by the Arab world with the avowed aim of destroying Israel.

Arab hostility set the stage long before Israel appeared in Judea Samaria in 1967 - long before Israel's tration and Congress that deter-

mine American foreign policy, not any other country. Inadvertently, Mr. Kamal has

laid bare the essence of the Arab-Israeli conflict: the Arab inability truly to accept the historical and moral legitimacy of the Jewish state. tacks against the Jewish people of Palestine were common enough in By ascribing the establishment of the late 1920s and 1930s. Moreover, Israel to the "centuries-old Jewish a look at the PLO's intransigent hard inte - as seen in the Algiers meeting yearning for permanent refuge against discrimination and oppression," be shows the Arabs' lack of of the PLO National Council, Yasser

U.S. military aid to Egypt, a modertraditional Arab charge, repeated by Mr. Kamal, that Israel has been ate Arab state. The key to a definition of moderation and friendship is

If Jordan wants peace, it need only And there is something demeaning about Mr. Kamal's blaming the accept the Israeli government's open American Jewish "pro-Israel lob-The Jordanian government and its by" for U.S. support for Israel -as though there were not objective king would encounter the same overprofound moral values underlying that support. It is the U.S. adminis-tration and Congress that the sum of the same over-The Washington Post.

House package passed earlier. It would cut the deficit by about \$37 billion for fiscal 1988 rather than the impossible \$62 billion called for by

the Gramm-Radman-Hollings law. Like the House, the Senate would get about half of the \$37 billion budget reduction for fiscal 1988, or \$18 billion, through tax increases. The schalors came up with one new wrinkle: a provision that would allow for billion increase in military a \$7 spending, but only if the president would accept \$7 billion in new taxes.

There are moves in both houses to put new life in the budget-balancing law by creating a more realistic timetable for it. Another idea is to find a way of restoring the antomatic reduction mechanism, which worked well before the Supreme Court rejected it. The revised timetable would add a sponsible Federal Budget said last week that a series of budgetary steps year to the 1991 target date for a balanced budget. This would recog-nize that the Granna-Rudman deficit target of \$108 billion cannot be schieved in 1988, but might be in 1989 if something like the proposed \$37 billion reduction took effect. That would cut the deficit for 1988 to

around \$135 billion. Taking two years, instead of one, to accomplish a huge budget reduction makes sense at a time when the economy is shaky. But to have any chance at all, these proposals for senous deficit reductions must have as a base the president's willingness to raise taxes to the degree suggested by the congres-sional Democrats. And whether any of it will then offer relief for the global

achievements of the President during his tenure of office, including the

From here it is but a step to the posed" on the region.

Mr. Taft and Theodore Rooseveltreached a degree of unprecedented intensity [on May 13], when the President, speaking at Cambridge, Ohio, flatly accused his predecessor of "trying to "honeytuggle" the Ameri-can people." Mr. Taft warned, his bearers that they would be jeopardizing the country if they fed the ego-tism and vanity of Mr. Roosevelt by putting him in office again.

these conditions. It is already being deployed in European waters: the Tomahawk sca-launched cruise mis-sile, carried on U.S. warships. The navy has ordered 4,000 of these W weapons, of which up to one-fourth are expected to carry nuclear charges. A small number of these missiles,

A weapon exists that combines

dedicated to the European theater, would allow NATO to get rid of questionable short-range systems and to base determence in Europe on politically and militarily sensible forces. There are problems with this pro-

posal. The U.S. Navy has always been reductant to have its cruise missiles allocated to any specific region, view-ing them as a "floating" asset. That tude would have to be revised. And NATO's supreme European commander would have to be given authority over a sca-going cruise missile force in European waters, just as he has authority over all U.S. ouclear

weapons based on land in Europe. No less important, a cruise missile force dedicated to Europe must involve Europeans. European vessels could escort the missile carriers, which should be based in Europe.

There would be political reservations about this, but they could be overcome if the creation of the new force were clearly coupled to the removal of all existing land-based nuclear capabilities from the continent. The West cannot afford to let Mik-

hail Gorbachev define its deterrence needs. It must regain the initiative, in the interest of security and of arms control. A dedicated sea-going force of cruise missiles, attached to Europe, would serve these interests well.

 $\mathbb{T} = \mathbb{Z}^n$

Four years ago she was 29, and received the harshest sentence a woman political prisoner in the Soviet Union

She does not seem to feel that the choices that brought her to the Gulag were choices; they were as natural as breaths.

has received since the Stalin era: seven years' hard labor in a camp for "espe-cially dangerous state criminals." Miss Ratushinskaya's principal crime

was writing poetry. She describes her poetry as unpoliti-cal, hut nothing is considered unpolitical by a totalitarian regime. Furthermore, her poetry expresses a religious sensibility, for which she credits the regime. Just as boring Sunday schools have produced unbelievers, the reaction of 8-year-old Irina to anti-religious propaganda in school was: God matters. Poetry and human rights activism led

first to six months of interrogation in the KGB's Kiev prison, used for Gestapo interrogations after the Soviet-Nazi pact fell apart and Kiev was in German hands. She was transported to the labor camp in a windowless cargo car - another echo of Soviet-Nazi affinities. When Miss Ratushinskaya confronted the provocations of camp authorities, this woman with the mild surface displayed a porcupine personality, bristling with spiky resistance.

She does not speak as though - she does not seem to feel — that the choices that hrought her to the Gulag, and then to torture and the edge of death, were choices. Her moral metabolism made the choices as natural as breaths. Because of her spiritedness, camp authori-tics shaved ber bead. When she fasted to protest mistreatment of others, she was handcuffed and force-fed by six men. Knocked unconscious in the struggle, she had liquids poured down her throat.

Swollen from the salty diet, she spent much time in icy punishment cells where at times she was fed only every other day. Yet she used matchsticks to carve poems into soap bars, memorized them, then washed them away:

We live stubbornly, like a small beast who's gnawed off his paw to get out of a trap on three. We've mastered that science And with brave smile -

Restorments in the second s In 1999 Barrier Statements Second S

that way the wounds are bandaged tighter . . .

She could share her poems, as she did with her two guards, who asked her to recite an example of her criminal deeds. They were struck by this glimpse of beauty and intelligence in their barren world, but had no paper. So one guard transcribed the poem on the other guard's undershirt.

Miss Ratushinskaya has large brown eyes that do not blink often; they have seen much. Her matter-of-factness about her pilgrimage through fire makes an untested Westerner feel as flimsy as papier-mâché. Isolated, tortured, ha-rassed, starved, exhausted, frozen, she could at any time have won release by signing an acknowledgment of "guilt." She never considered that. Instead, she fought the enforced senselessness - of camp life, the petty regulations and du-ties by which the authorities seek to

hreak spirits and flatten personalities. Because of the gentleness of life in good societies, we can live long lives and never need to be as brave as she was daily, instinctively. In her prison poems, her voice was at times almost jauniy: Well, we'll live

as the soul directs. not asking for other bread.

And I will get myself a tame mouse while having a dog is impossible ... He and I will invent a land where there are neither cats nor

We'll make a home behind any bars, beyond any February — spring ... We'll raise a dog anyway, but in better times.

.Those who believe that the release of Miss Ratushinskaya and a few others like her means much better times for her country should hear ber contrary opinion. She knows that she is out only on's watch, without even mentioning the

because she is a poet, and that thou-sands of others languish because they have no comparable hold on the world's imagination. That is why she cannot yet know the ease she imagined in prison, the contentment of being able to say, We'll unsaddle the day - to graze." She was released from prison the day porter sought to become a "superstar.

Mr. Price writes: "If the current inbefore the Iceland summit meeting, as a detta [comparable to Watergate, that is], the likely immediate cost will be Central party favor for the West, a sign of Soviet interest in new agreements. So ended the saga that began when the KGB raid-ed her apartment and seized books they America." The cost to whom? To the really own Central America? GENERAL NEWS

States in that region than is the existence of the government of Nicaragua. Mr. Price, the Watergate hearings were not really a vendetta. The Irangate hearings will not be one either. And I agree with you: This time, for a change, only the truth.

> PAUL BIRCHARD. Glasgow.

Mr. Price's diatribe breaks new ground in demagoguery. He implies that if the Watergate co-

erup had succeeded, 25 million people in Asia would have remained free, and two million would not have died. Can you prove that, Mr. Price? Does the writer want us to believe that

the coverup never took place? That the House of Representatives based its arucles of impeachment on the work of lying journalists? Nowhere does Mr. Price cite a single

example of media misconduct. Being a poor loser seems to be par for the course for former Nixon staffer former Nixon staffers.

E, ERNEST GOLDSTEIN. Villars-sur-Ollon, Switzerland.

Share the Defense Burden

There is a tendency to blame America's overnment and its industry for a series of problems relating to the U.S. budget and trade deficits, as well as for the inability to cope with this situation and prevent worldwide economic instability.

But it cannot be overlooked that the military expenditures of the United States represent about 25 percent of the

national budget, as compared with 1 to 2 percent in Japan and about 10 percent in West Germany, countries America is and other successful exporters deserve a pledged to protect and which enjoy strong economies and large foreign trade surpluses. The defense burden should be more equally shared by the allies, thus reducing the U.S. budget deficit, The allies should buy more weapons

systems from the United States instead of developing their own. They should refrain from subsidizing their aircraft industries and buy military and commercial planes in the United States instead.

The industrial nations should also restrain their exports to the United States and promote imports from the United States of goods that are competitive and have a high level of technology and ouality, so as to achieve a balanced trade ith the United States.

They should bear in mind that this would represent the least evil -- because a continued foreign trade deficit may lead to major economic and political shocks. These governments must make it clear to their electorates that reasonable sacrifices at the right time may prevent future shocks and catastrophes that would be much more painful.

Just When I Was Prepared For Nothing to Go Right ...

By Richard Reeves

N EW YORK — Like a jerk 1 lost my wallet in midtown Manhattan last Tuesday, I had trouble sleeping, thinking about Weinesday and the agony of waiting in long lines to prove I existed by getting a new driver's license, bank card. credit cards and all the rest.

My only consolation was that I could write this column using the hassle and the

MEANWHILE

long lines as a metaphor to show that nothing works anymore in America 1 composed whole paragraphs in bed: the contusion in airports with passengers and planes stacked up everywhere; the lousy service in stores that no longer seem to have clerks; being put on hold and being bombarded by Mantovani and commercials until the dial tone seturns.

"Lean and mean" American business sometimes means no human beings on the other end of the telephone. And long lines and surly clerks. New Yorkers with

m, to solve the U.S. trade deficit problem. Mr. Gephardt believes that Japan strong dose of the "mg suck."

Americans living abroad are already familiar with Mr. Gephardi's brawny views on trade, and we have felt the sting of his inspirational padole. Last year, and for several years previously, he pushed hard in the Congress for the elimination of Section 911 of the Tax Code, which gives Americans working abroad a limited exclusion of foreignearned income from their U.S. taxes

Some of us have never understood the sense of the United States harassing its entrepreneurs overseas, and giving employers financial incentive not to hire Americans for jobs abroad. President Carter's Export Council in 1979 said that this practice costs the country billions of dollars in lost exports each year. We ask Mr. Gephardt why Japan and

other successful exporting countries go out of their way to support their citizens working abroad. Has he not thought it curious that none of America's trade competitors taxes the foreign source income of its citizens living in the United States or anywhere else?

Given the excitement about Mr. Gephardt's prospects for the White House, and the fact that be wants to get there as a champion of improved trade performance, the two million overseas Ameri-cans should ask what will happen if he is elected. On his past performance, we are all in for very sore bottoms.

ANDREW P. SUNBERG. Geneva

money, 1 hear, are hiring poorer people to wait in lines for them at places such as government agencies and airline offices. I know the system from Third World countries like Pakistan and Indonesia.

Page 5

Page 7

So. Wednesday finally dawned as one of the worst days of my life. After screaming at the bahy and turning her over to her sister, 1 left for the lines at 10:40 A.M. 1 was on East 86th Street, and my first stop was at the American Express main office on lower Broadway.

Mr. Reeves? We've been expecting you," the receptionist said, mentioning that the computer showed I had reported my credit card missing. "I am sorry, but it will take us another 10 minutes to get your new card ready."

That one was easy. At the Chemical Bank branch around the corner, the assistant manager said: Your hranch is in Sag Harbor? That's timost a hundred miles away. You'd better fill out this form."

That took 30 seconds. Name, address, account number, "O.K.," he said with a smile. "You'll get a new card in the mail within 10 days." "Yeah," I said, "but how do I get

money without a card to put in the cash machine?" He approved my check right there and I walked out with \$200.

But all that was in the private sector. Now it was Kafka time: the Department of Motor Vehicles.

"New or renewal?" said the lady at the information desk near City Hall. "Well, I loss my license," I said. "Renewal," she barked. "Fill out Form

44, then go to the yellow chain." It seemed to be half a mile away. But after filing out the short form - name, address, birthdate --- I went to my assigned chain. Only six people were ahead of me. There were also two "expediters" to

belp us with any questions. In five minutes, I was facing a woman wearing a tag that said "L. Blocker," She looked at my form and said, "Six-fifty." I paid and she said, "Go to the back and

they'll take your photograph." The photo-taker said: "Smile, O.K. The permanent one should arrive by mail within 10 days. Have a nice day. It was 11:38 A.M. My ordeal had taken all of 58 minutes. I went across to the Municipal Building and took the subway back uptown. The train was spotless, part of a new program to clean graffiti off each subway car three times a day.

I got back to my office after lunch. The first call was from my union, the American Federation of Television and Radio Artists. A lady named Marta Wagner had found my wallet in Central Park, seen my union card and delivered everything to AFTRA headquarters.

Nothing was missing. America may be falling apart. But you couldn't tell it by me today. Lintversal Press Syndicate.

Referendum to Test Ireland's Faith in EC

Ireland is the only EC country that has not IOT NUCIEAR DISARI A spokeswoman for the coalition, Carol Fox, said that the Single European Act was part of a wider attempt to establish "an all-European

It's not just our flights that

DUBLIN --- Ireland's long-debated role in Europe will be put to the test this month in a court-ordered referendum on the European Community's latest drive for unity.

Last month, the Irish Supreme Court ruled that the Single European Act was unconstitutional. The Irish Parliament had voted in December to approve the act, which updates the EC's founding treaty and creates a mechanism for coordinating the foreign policies of the community's 12 member nations.

The Irish court ruled, 3-2, that the act illegal-ly infringed on Ireland's right to shape its own foreign policy and that a constitutional amendment would be needed before the treaty could be considered valid.

The government has scheduled a referendum for May 26.

A broad coalition is seeking to block approval of the amendment. Opponents range from defenders of Ireland's traditional neutrality to conservative Catholics who fear that the act will require Ireland to legalize abortion.

ireland is the only EC member that does not also belong to the North Atlantic Treaty Organization, the defense alliance that links a group of European countries with the United States and Canada.

The amendment is supported by Ireland's three major political parties and is expected to win approval. The Irish public is well disposed toward the EC, which has pumped millions of pounds into the country since it joined in 1973. Entry into the EC was approved by 83 per-

cent of the country's voters in a 1972 hallot. To campaign against the May 26 measure, several organizations have banded together in a Coalition for Peace and Neutrality. The alli-

ance includes such groups as the Ireland-Cuba

Opponents of the EC measure range from defenders of Ireland's traditional neutrality to conservatives who fear it could force the country to legalize abortion.

super-state. And any identification with that is

going to inevitably draw us into NATO." She said she feared that Western Europe was moving toward creating its own nuclear arse-nal. "People went into the EC." she said, "thinking it was going to be an economic com-munity, not thinking it was going to be a nuclear superpower." Mrs. Fox criticized the act's proponents for

epicting it as a simple vote on EC membership. If the act were renounced by Irish voters, she said, Ireland could simply renegotiate its position within the EC.

"It is just impossible" she said, "for any country to be thrown out of the EC."

country to be thrown out of the EC." But that view was rejected by Peter Doyle, a spokesman in the Dublin office of the Europe-an Commission, the EC's executive body. Before Denmark approved the European Single Act in a referendum last year, Mr. Doyle said, the other member states, including Ire-

ratified the act. Defeat of the measure, Mr. Doyle said, would mean that "Ireland's position in the community would very quickly be-come untenable."

"If we reject the Single European Act," he said, referring to Ireland, "we'll be in a two-tier Europe and we'll be in a second tier all on our own. And we'll be left behind."

Mr. Doyle denied that the legislation would copardize the country's neutrality. "In fact," he said, "the Irish neutral position is given implicit recognition in the new treaty, which it never had before." "The other member states," he added, "are

not interested in Irish neutrality. It is not an ssue for them."

The Supreme Court decision resulted from a suit brought by Raymond Crotty, an agricultural economist.

Mr. Crotry believes that EC policies helped drive up Irish unemployment and that the measure will transfer too much power to central authorities.

Ireland is proud of its nonaligned status. It remained neutral during World War II and it opposed the use of British force against Argentina during the 1982 Falklands war.

It also has taken a tougher line on apartheid than its European partners, imposing a ban on imports of South African produce.

Jacques Delors of France, who is president of the European Commission, sees the Single European Act as central to "Europe's credibility." He expects the measure to help bring about a "frontier-free market" and "greater economic and social cohesion," as well as a joint research and technology policy, a stronger European Monetary System and "meaningful measures for the environment."

The Soviet Union also contends any testing teat is not contended under tight constraints of the traditerpreted as imposing strict limits ABM treaty. on SDI research.

On Tuesday, the House of Rep-Delaware, who is pursuing the resentatives voted to cut another \$500 million from funding for SDI while Senate Republicans vowed to fight a bill that contains restrictions on testing.

The key vote in the House came on an amendment proposed to a two-year Defense Department authorization bill by Representative Charles E, Bennett, Democrat of Florida, His proposal would reduce funding for the space-based de-fense program in the pext fiscal year from \$3.6 hillion to \$3.1 bil-lion.

The amendment was approved 219-199, with 20 Republicans who opposed the Reagan administration providing the margin of approval

In a direct test of sentiment on early deployment of the program, the House also decisively rejected an amendment by Representative Jack F. Kemp, Republican of New York, calling for "operational ca-pability" of a space-based defense system by 1993.

The vote was 301-122 as 58 Republicans opposed Mr. Kemp, who has announced his candidacy for

After rejecting Mr. Kemp's Mr. Reagan has vowed to veto WASHINGTON - President amendment, the House added to any legislation that tries to carb his Ronald Reagan told Congress on restrictions that already were in the arms policies. written descriptions of their monu-mental achievement. According to Paul Needham, curator of printed books and bindings at the Morgan (which owns three Gutenberg Bibles), no one knows what Gutenberg's printing press looked like. But Dr. Needham and the cyclotron team at Davis have learned a great deal about how Gutenberg and his associates worked and what materials they used.

Directing the cyclotron analyses of old documents is Thomas A. Cahill, bead of the Crocker Nuclear Laboratory at Davis. "One of the

Cahill said in an interview, "was all of them as superb. The left and

Scholarly detective work has as-

certained that 158 to 180 copies of the 42-line Bible were printed, of which 48 survive, each valued at Dr. Cahill and Richard N.

Schwab, a history professor at Davis, began applying the cyclotron to historical problems in the early 1980s as an outgrowth of the Crocker Laboratory's work on air pollution. The cyclotron accelerates a narrow beam of protons that pierces a sample, and protons col-lide with some of the atoms in the sample along the way. When this happens the atoms emit X-rays, whose varying energies match the specific types of atoms from which they were emitted. A detector measures these energies, and with this data a computer can determine the types and quantities of the elements present in the substance being studied

Dr. Cahill believes the high levels Only the heavier elements can be of copper and lead in Gutenberg's inque, particle induced X-ray emisinks account for the fact that the printing in his books remains as sion, cannot analyze the chemistry fresh, glossy and black as it was of a sample, Dr. Cahill said. But for when it came off his press. Bibliog-raphers regard the Gutenberg Biexamining rare documents the technique offers two valuable feable, printed between 1454 and 1456, as one of the most perfectly tures: the proton beam is too attenuated to damage the sample, and the X-rays emitted by the sample printed books, rarely matched in quality even in modern times.

thans "Useful' Modes of Thinking Contribute to Prejudice

By Daniel Goleman New York Times Service TN seeking to understand the te-L nacity of prejudice, researchers are turning away from such extreme racism as that exhibited by members of the Ku Khux Klan to examine the pernicious stereotypes among people who do not consider themselves prejudiced.

A troubling aspect of the prob-lem, they find, is that many stereotypes seem to be helpful in organizing perceptions of the world. One finding is that people tend to seek and remember situations that reinforce stcreotypes, while avoiding those that do not.

Another troubling conclusion of the research is that simply putting people of different races together does not necessarily climinate prej-udice. For example, Walter Ste-

IN BRIEF

The Snail Darter Strikes Again

BENTON, Tennessee (AP) - The three-inch snail darter, notorious for holding up a Tennessee (AP) — The three-inch shall darler, holdroous for holding up a Tennessee Valley Authority dam project, has added six months to the construction of a Hiwassee River bridge, officials say. Controversy over the brown and black fish balted completion of TVA's Tellico Dam for six years beginning in 1973. The darter, once found only on the Little Tennessee River where Tellico Dam is located, was trans-planted to the Hiwassee River nearby to allow for completion in 1979 of the multimillion dollar dam. Construction time for the Hiwassee River bridge in east Tennessee's Polk County was extended to 24 months so the river would not be disturbed by workmen and equipment during the darters' egg-laying cycle in late April.

More Evidence of Earth Collision

NEW YORK (NYT) - Geologists have found strong new evidence to support the theory that a huge asteroid or comet collided with the Earth 65 million years ago and could have been responsible for mass extinctions of life, including the demise of the dinosaurs.

In a report in the journal Science, the geologists said that microscopic particles of quartz found in 65-million-year-old sediments around the world contained structural cracks associated with a single cataclysmic impact. The fracture patterns in the quartz, they said, appeared to rule out an alternative theory involving widespread volcanic eruptions as a cause of the extinctions.

The scientists said the "shocked quartz" crystals were found in eight widely separated places, from Europe to New Zealand, indicating a global phenomenon.

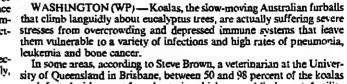

Chocolate Linked to Heartburn

CHICAGO (UPI) - Chocolate-lovers may be distressed by a new study that found the object of their affection, the renowned confectionary cure for heartache, is also a primary cause of heartburn.

Researchers at a meeting of digestive disease specialists also warned that a sweetener found in many fruit juices and sugar-free candies may romote intestinal distress in children. In people already prone to acid indigestion, even a few tablespoons of cbocolate can induce the familiar irritation of the esopbagus also known as heartburn, reported Dr. Donald Castell, chairman of gastrology at Bowman Gray School of Medicine. Winston-Salem. North Carolina.

People with chronic heartburn problems, which includes about 10 percent of the population, thus should probably avoid chocolate altogeth-er, Dr. Castell reluctantly advised.

phan, a psychologist at the Univer-sity of Delaware, found in a review alytic view to a cognitive one, in of 18 studies of the effects of school which most prejudice is seen as the desegregation that interracial hos-tilities rose more often than they decreased at desegregated schools.

Overt, admitted bigotry is on the decline, studies indicate. Yet they reveal that a more subtle form of prejudice, in which people disavow

Such people justify prejudiced actions or attitudes with what they believe are rational, non-racist explanations. To those who have felt the sting of racial discrimination, the phenomenon is well known. An employer, for instance, may reject a black joh applicant, ostensibly not because of his race but because the employer says he believes the person's education and experience are not quite right. Yet a white applicant with the same qualifications is hired.

Part of the difficulty in eradicating prejudice, even in those who intellectually see it as wrong, stems from its deep emotional roots. The emotions of prejudice are formed early in childhood, while the beliefs that are used to justify it come later," said Thomas Petticome later, said internet grew, a psychologist at the Univer-sity of California at Santa Cruz-"Later in life, you may want to change your prejudice, but it is far easier to change your intellectual beliefs than your deep feelings."

Psychoanalytic theories, ton, point to the importance of childhood experience. "We distinguish between the familiar and the strange early in infancy," said Mortimer Ostow, a psychoanalyst and professor of pastoral psychiatry at the Jewish Theological Seminary in New York. Then in childhood, when we join groups, we learn to draw boundaries between us and them. By adolescence the group identity becomes even more important, and out-groups become the place to deposit our own faults."

The classic psychoanalytic htera-ture on prejudice notes that a person's own sense of insecurity is ofion reflected in the need to find an out-group to despise, with the person's most loathed personality characteristics pushed onto some-one else - thus, the "filthy" Jews or blacks, or Italians or whites. New work is adding to the theories.

Dr. Ostow and other psychoanalysts have studied people in treatment who explored their own anti-Semitic prejudices. "The inner dynamics are surprising," said Dr. Ostow. "We find that there almost wave was a time in the past when

Much of the recent work on prej-When white students offered help to black students, the blacks often sputned the offers, seeing them as a confirmation of the attitudes they

Page 8

Until now, computer companies have chosen to lock their customers in little cages. Restricted to their own "closed" data systems.

This is our opportunity at Ericsson. Our new technology opens cages.

We can help you link computer worlds together and build a flexible, economical communications system. An "open" system. "Open" to international standards. And to the future.

That's one of the reasons why we have developed our new "multi-lingual" terminals. On these new generation terminals you just push a button to switch from IBM to DEC to Sperry... "Openness" is one cornerstone of our strategy.

The other is simplicity.

That's why we have developed our new digital, modular office exchanges. With them you can quickly and simply build up your computer network so that everybody in the company has access to computer power and information. Quite simply, you use your telephone wires. And you can plug in personal computers, word processors and terminals as easily as telephones.

If you feel trapped in a "closed" system, maybe you should join our liberation movement.

It opens up a lot of exciting possibilities.

being transacted on a net noncommission basis. Much larger block trades are possible and many fund managers took advantage of the cheaper dealing costs immediately after Big Bang to restructure their portfolios.

By Janet Porter

Likewise, corporate treasurers are being wooed with all sorts of new financial products and acquisition proposals from investment houses hungry for their husiness,

Nevertheless, reservations and mispivings about the new-style financial markets persist. During the hectic years before Big Bang, there was so much pressure on banks, stockbrokers, stockjohbers and other financial institutions to merge with the right partners, recruit new staff, install electronic trading systems and find suitable premises that little attention was given by many to what is arguably the most important area of all - the demands of the customer.

Since October, the pressure has switched to earnings and the need to start showing a swift return on their huge investments, forcing many firms that have never before had to cope with deregulated markets to cut back wherever possible in order to stay afloat. But this short-term approach looks certain to be disastrous in the nger term, as powerful customers become disenchanted and take their husiness elsewhere,

Although the widely anticipated bloodbath has not yet happened, largely because of booming stock markets, many securities and investment houses are struggling to survive in a markeiplace described hy participants as "bru-

The large increase in equity turnover in recent months, helped by the post-Big Bang boom in portfolio restructurings and overseas demand for pound-denominated securities, has certainly made the transition easier. Trad-

Big Bang Fallout

ing skills probably will not be fully tested until the arrival of a bear markes - something many players on both sides of the marketplace have never experienced.

So far, there has only been one casualty Midland Montagu, the investment and securi-ties arm of Midland Bank, closed down the equity market-making operations of Greenwell Montagu Securities in March after suffering trading losses of £6 million (about \$10 million).

While no other firm has, as yet, taken such a drastic step as Midland. a shakeout is nevertheless occurring.

A number of houses are reducing the range of stocks in which they will make a market and some have already withdrawn from whole industry sectors. In the British government securities (gilts) market. only about a dozen of the 27 approved primary dealers are really active, with the rest having just a tiny share of the business.

Some of the United Kingdom's biggest fund managers say they have already stopped deal-ing with certain institutions where conflicts of interest were suspected. In-house analysts in several firms are known to pass on, huy or sell recommendations to their market-making departments some days before sending out circulars to their institutional clients.

"There are certain to be more casualties unless clients are prepared to put up with a third-rate service," said David Malcolm, chief investment manager at Royal Insurance, one of Britain's top insurance companies with an investment portfolio of about £9 hillion.

He says he is unhappy with a number of aspects of Big Bang, notably serious óelays in the completion of back-office paperwork and falling standards of research.

These views are shared by Mick Newmarch, chief executive of Prudential Portfolio Managers Ltd., a subsidiary of Britain's largest insti-tutional investor, Prudential Corporation.

Gilts Soaring, Buoyed by Confidence in Conservatives' Prospects

. . .

By Kevin Muchring

ONDON — It is hardly surprising that a talk on the Brinsh government debt market during a recent conference here focused almost entirely on the re-election prospects of Prime Minister Margaret Thatcher's Conservative Party in the elections set for June 11.

In the first two months after last October's Big Bang, when dual-capacity trading and the elimination of fixed commissions swept away the old system and ushered in a restructured government debt, or gilt-edged market, slack retail demand and uncertainties over sterling translated into lackluster demand and trading volumes. Most of the primary players turned in losses and a few had already accumulated

ou!

new

KEVIN MUEHRING is a contributing editor Institutional Investor magazine

substantial losses in a pre-Big Bang enphoria for market share. But since the turn of the year, volume has

soared, nearly trebling to an average turnover of £3.5 billion (\$5.77 billion) a day, according to Bank of England statistics. The upswing in trading volumes enabled most of the firms to eke out a modest rise in profitability. And it was almost entirely premised on growing investor confidence that the Conservatives will be returned to power.

Despite widely anticipated bloodbaths in the newly revamped gilt-edged market, none of the 27 designated primary market makers in the market has dropped out — yet. The pundits are still betting the store that a shakeout among the 27 will tarn 1987 into a make-orbreak year for many firms.

In the U.S. Treasury market, for instance, there are only a handful more dealers - about 35 institutions in the primary end of the market - but they are dealing in a market with five times the size and 20 to 30 times the trading volume. There is more than \$1 trillion out-

Volume is crucial to profitability, and winning market share has been the dominant strategic attack.

TechLL: SANGWICHES . RO

AT TAXT. ALAN SERVICE

standing in the U.S. Treasury market, while gilts amount to less than \$200 million; \$100 billion to \$150 billion worth of Treasuries can change hands in a single day in New York. compared to the equivalent \$5.5 billion or so of gilts in London.

A survey conducted among British institu-tional investors in January by the agency-broker Capel-Cure Meyers showed that nearly half believed that fewer than 15 of the 27

primary market makers would survive the first three years of competition.

It is enough to make a logical mind question why anyone would so willingly enter such a doom-laden scenario. But many firms feel they have no choice.

In the race to be a major first-tier player in what is seen as a developing global capital market, the need to service a previously sheltered domestic client base, much less to win a

slice of the international institutional client with a combined capitalization of £600 hillion, hase, means that the financial firms must ex-14 of which are either American or Swiss and tend their capabilities to each of the main financial markets.

Gilts are at the heart of the London market and London is one of the three key financial hubs in the global marketplace.

The major international financial intermediaries are also increasingly arhitraging the inter-est rate differentials among the big three freely traded government debt markets through the use of the more sophisticated financial engineering of the last few years. Synthetic instruments can be created that offer higher yields.

Previously, the gilts market was structured around the Bank of England's direct dealing with a half dozen jobbing or trading firms, dominated in fact hy just two johbers, with a combined capital of £100 million, who sold the government gilts onto the stockhrokers who had access to the largely British-based institu-

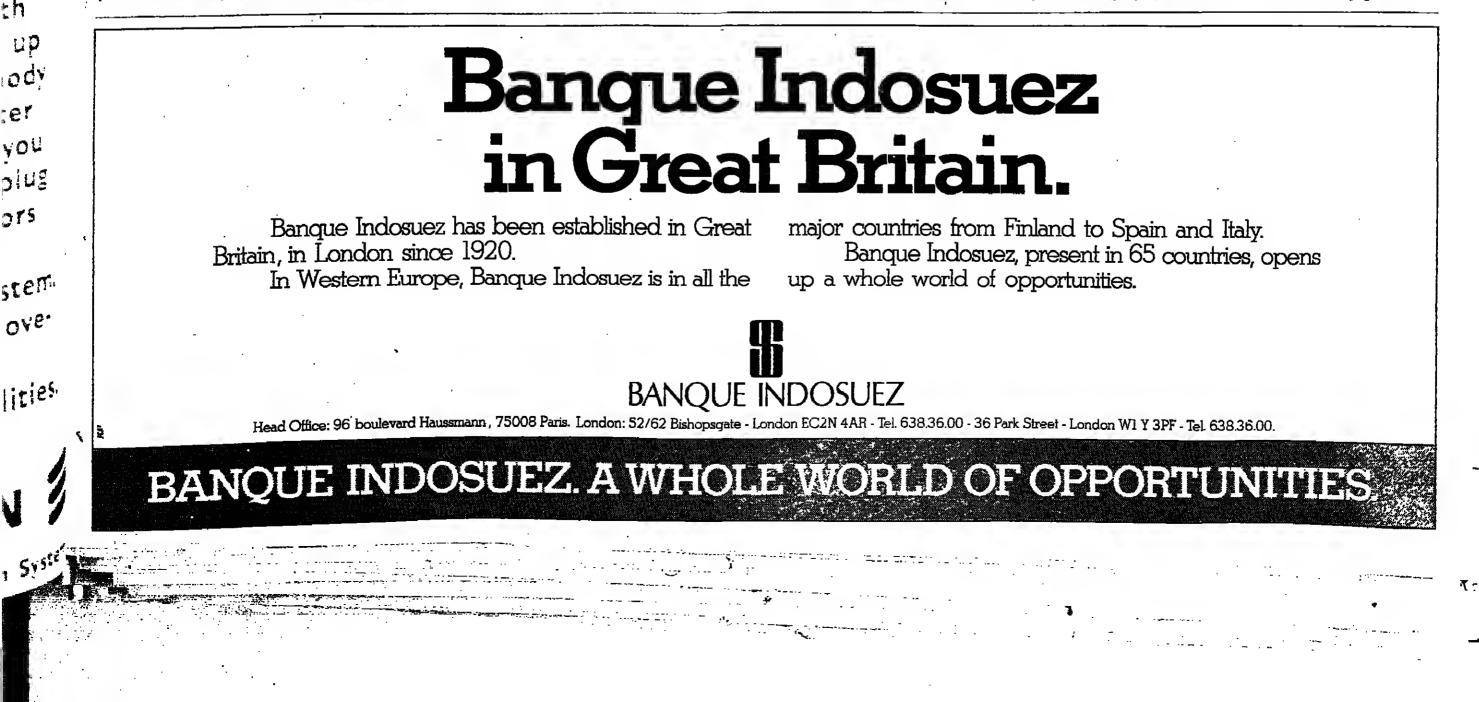

tional client hase. Since Big Bang, the Bank of England deals directly with 27 dual-capacity market makers

14 of which are either American or Swiss and Canadian owned. Six interdealer brokers. taking 1/128th percentage point on each turn, are adding liquidity to the market by increasing the volume of intraprofessional trading. In exchange for direct access to the Bank of England and the issuance of British deht securitics, the 27 primary players are committed to continuous two-way market-making in fair or foul markets.

This month, further changes were made in the structure of the market. The Bank of England launched a limited auction system to supplement its present "tap" system of issuing government deht in which £1 hillion of shortdated gilts were auctioned. Larger auctions of medium- and long-term bonds will be offered later in the year.

The Bank of England stresses that the auction will be limited, not neccesarily to replace the tap system but to supplement it, in the

Sinking Under a Sea of Paper

Pressure Grows on Bankers, Brokers to Clean Up Their Back Offices

By Fianmetta Rocco

- ONDON -- The success of the new City conglomerates that have spent millions building vast new dealing rooms to take on the challenge of global equity trading is being threatened not only by the competitive challenge of New York and Tokyo, but by a danger that is much closer to home. This is the growing pressure on the back office to ensure that each order for each security is digested, invoiced, cleared, paid for and delivered

At its best, an efficient back office settlement system should perform all these tasks on time and with perfect reliability. The reality six months after Big Bang is far from this ideal. And banks and brokers are worried that, unless they get their back offices straightened out soon, the heavy investments they have made in the new front office electronic dealing rooms will be lost.

The pressure now facing back offices is be-ing applied from several fronts. Historically, the settlements end of a broking partnership was always treated as the poor relation of the fee-earning side. As a result, investment in new systems was insufficient and staff in those departments always poorly paid.

But the increased competition engendered by the start-up of net trading and the abolition of fixed commissions has forced firms to streamline their administration systems. Some of the software for this technology was import-ed from the United States, but there was little time to adapt it properly to the British market. or to firms' specific needs.

Moreover, these changes came at a time when trading volumes were at an all-time high and increasing every week, prompted in part by the Conservative government's privatiza-tion program and its championing of share ownership.

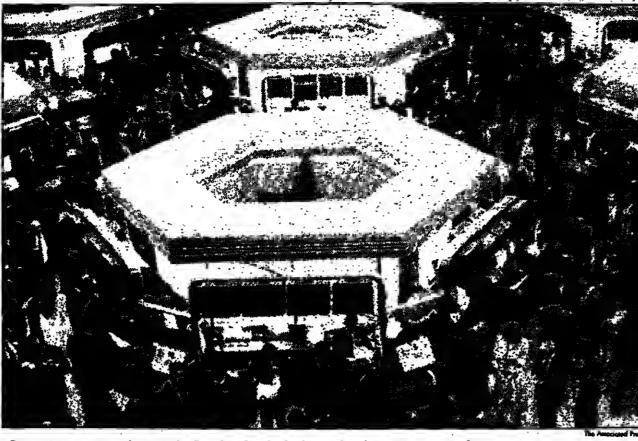

Three times as many people owned shares in 1986 than when Prime Minister Margaret Thatcher came to power in 1979, and the stock exchange now processes about 40,000 trades a day, compared with just over half that a year

Furthermore, each major privatization in-creases trading volumes by 25 percent over the

Buy and sell orders of British shares are then entered onto the dealing firm's computer tapes that are deposited every evening into the stock exchange's Talisman computer system, where they are matched against the counterparty's

Before being transferred to their new owners, these shares are gathered together within SEPON, the stock exchange's nominee account, which acts as a pool from which stock is delivered to the registrar. Invoicing and payment collection in most cases is done by the firms themselves.

Dealing firms had four types of computerized settlements procedures to choose from when preparing for Big Bang. They could rewrite their own software from scratch, buy packaged software from a specialist firm, use

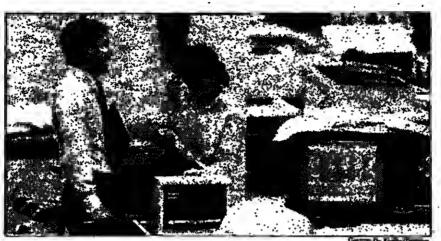

Since Big Bang, trading on the London Stock Exchange has been computerized.

The stock exchange now processes about 40,000 trades a The infrastructure for trading, when it works, is relatively simple, if detailed. Securi-ties dealers date-stamp trades as they are done. With inset or per with just over half that a year ago.

> the services of a settlements bureau for billing and paying clients and for clearing securities, or go to one of the two all-in clearing firms that perform all these functions.

All of these options have suffered from strain since the day of Big Bang, Oct. 27. Most firms opted for a combination of buying software and having it tailor-made for their internal administration as well as using a settlements bureau for matching bargains and entering them into the Talisman system.

Working behind the scenes in electronic security trading.

The closure of National Westminster Bank's Center-file settlements bureau last September forced 19 brokers and jobbers to make new arrangements and vastly increased the pressure on the bigger of the two remaining firms, NMW Computers, which now clears 40 percent to 50 percent of stock exchange trades each day.

NMW chose to change over to a new hardware system around the time of Big Bang, but, according to several players in the market, their system becomes overloaded several times a week and their input into the Talisman computer is up to three hours late two days out of

Even more severe problems exist within the

Traders and dealers look at empty screens during a computer breakdown.

firms themselves. Most of those that opted for developing a more extensive in-house network developing a more extensive in-more normal tinned to a small but growing software house. Consultants (Computer & Financial) (CCF). However, many put in their software orders very late and have since been dissatisfied with the service they have received.

One major British cleaning bank, which ought a slockbroker as part of its investment for the post-Big Bang era, says it has counted 123 design faults since October in the system CCF installed. As a result, this bank has had to double its staff in the settlements department and it is still operating a round-the-clock schedule seven days a week to clear the back-

Among the problems this bank and other dealers are facing are unreconciled deals where there may be a boyer but no seller, trades that do not match either in price or size, lost transactions, buy orders that are misquoted as sales or vice versa, and mismatched accounting.

"It's a real mess," said a settlements director for one of the major brokers.

in recent weeks, some dealers have been so keen to keep the worst of the situation from their clients that they will pay clients selling shares out of the firm's own account instead of waiting to receive the remittance owed to them from on-selling those shares.

Known in the trade as a "fail" or a "break," this out-of-pocket payment would normally be expected on fewer than 5 percent of trades.

"We're seeing fail rates of more than 15 percent," said the director of one of the major clearing banks.

None of the firms reported to be in trouble would confirm their difficulties. Nonetheless, Kleinwort Grieveson, one of the biggest players in the market with a much publicized personal share dealing service, was forced first to raise its charges from £12 (\$20) to £18 per action and then close the service altogeth-

Those that insist that the pessimists are doing no more than spreading doom and gloom about the gravity of the settlements problem in the City need only look back to the difficulties that New York dealing houses faced after deregulation there in May 1975 and the paperwork panic during the go-go years in the late 1960s.

Thea, galloping volumes and weak systems forced the stock exchange to close one day a week for several months in order to clear the settlements backlog, and two major firms, unable to get over the problem, closed for good.

"greatly concerned" by the back-office prob-lens being experienced by many broker-deal-ers. He remarked on the "discernible deterioration in the general quality of research since October 27." He also strongly criticized brokers' research efforts for paying scant regard to the real needs of clients, with too much emphasis placed on the alpha stocks and too bittle effort put behind the internationalization of rescarch

He told a recent conference that he was

Fund managers are retaliating by transact-ing a far greater share of business on an agency basis, happy to pay commissions to those bro-kers offering the best service. In the weeks immediately after Big Bang,

institutional investors were mostly dealing on a net basis directly with market makers. Royal Insurance estimates that this accounted for about 60 percent of its equity trading late last

However, as it became apparent that this was not always the most effective or efficient way of trading, Royal's fund managers started to do more business through brokers again. Now about 75 percent of equity trading is conducted on an agency basis, according to Mr. Maleolm

Corporate treasurers are equally critical of the advice they receive from some investment banks. One of Britain's biggest industrial con-cerns spoke of being "bombarded" with fund-raising proposals by bankers who have "no real understanding of our needs."

Others complain of the short-term horizons of those working in the City and the widely divergent objectives between financial institutions that can profit most from volarile mar-kets and industry that needs market stability. Many of the complaints are fully justified, enfor bankers concede. And there are already clear signs that the emerging heavyweights are those investment and securities houses paying the closest attention to what their customers have to say.

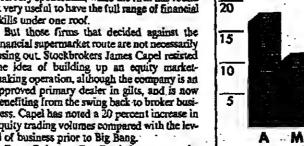

"We take our research capability very seriously - we would never try to pull a fast one on our clients," says Mercury International, the group that encompasses the merchant bank S.G. Warburg and Warburg Securities, formed from the merger of three top Stock Exchange firms - Akroyd & Smithers, Rowe & Pitman

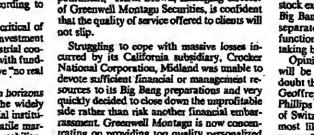

and Mullens & Co. The group is now dominating certain market sectors and gaining clients such as the Euro-tunnel consortium and British Petroleum because of its ability to provide a fully integrated financial capability. "More and more clients are beginning to like

the idea of one-stop shopping," according to a Mercury spokesman, while the firm has found it very useful to have the full range of financial skills under one roof.

inancial supermarket route are not necessarily losing out Stockbrokers James Capel resisted the idea of building up an equity market-making operation, although the company is an approved primary dealer in gilts, and is now benefiting from the swing back to broker busi-ness. Capel has noted a 20 percent increase in contrast of the second se equity trading volumes compared with the lev-el of business prior to Big Bang.

Peter Quinnen, Capel's chairman, says the firm is often able to negotiate a better price than the institutional investors can obtain. As fund managers start to recognize this, they are

Most participants expect London's securities market to gradually evolve along similar lines to New York's and Tokyo's. About half a dozen major players are emerging in particular sectors - not so very different from the way stock exchange business was transacted before Big Bang, when single capacity requirements separated stockbroking and stockjobbing functions and prevented one firm from under-

taking both types of business. Opinion is divided on whether this process will be quick or gradual, but there is little doubt that a thinning-out process is inevitable. Geoffrey Redman-Brown, senior director at Phillips & Drew, a subsidiary of Union Bank of Switzerland, reckons that the survivors are most likely to be those concerns that have successfully invested resources in all four vital areas - people, technology, office space and capital.

But a final note of caution is sounded by Gordon Pepper, senior adviser to Midland Montagu. He believes that for the last few months London has been in a phony-war period. Neither the U.S. nor the Japanese securities houses have started to compete properly yet, he says, but it is probably only a matter of time before they adopt a higher profile. That is when the war will really start, he adds.

THE FULL POTENTIAL OF THE GLOBAL EQUITIES MARKET IS ABOUT TO BE REVEALED

In 1964 Reuters introduced the first computerised equities quotation service in Europe. Since then the appetite for information

from world equities markets has grown beyond all recognition. Today we are seeing record trading volumes and a vast array of new instruments.

To meet today's explosive growth and the market's demands for the future, Reuters has developed a new communications network and computerised quotations system that will deliver worldwide securities information with unrivalled speed, accuracy and efficiency.

After investing millions of pounds and three hundred man years on software development, Reuters now has the technology in place.

Eurobond Dealers Reject Screen Trading

Special to the IHT ONDON -On Tuesday, the Association of International Bond Dealers (AIBD) announced that it had withdrawn plans to introduce a screen trading system for the Euro-bond market for the time being. Opposi-tion from the market's leading players who feared that if they freely displayed their prices their smaller competitors would feed off their business - had proved overwhelming and the issue had threatened to completely dominate proceedings at the AIBD's annual general meeting in Oslo DOXI WOOK

But the central problem will not g away. The AIBD wants the status of a recognized exchange under the framework of Britain's new Financial Services Act, and the Securities and Investments Board, the regulatory overseer of the network of self-regulatory organizations in the Loa-don financial markets that will be fully operative with its powers later this year, has made it clear that price transparity will be its main criteria in assessing how institu-tional markets are serving investors.

The AIBD has already set up a system of reporting dealers, by which to qualify as a cognized market-maker in Eurobond issues a house has to meet certain criteria in its trading, such as dealing in a specified proportion of costanding issues and post-ing daily prices for them. But the scrapping of the screen trading plan — which for a year has been the subject of a joint feasibil-ity study with the U.S. National Associa-tion of Securities Dealer — could screen the tion of Securities Dealers - could prove a severe setback in the longer term to the association's ambition to regulate itself. There is an irony in these developments,

which are primarily geared to improving the transparency of market prices, the SIB's primary concern in protecting inves-tors in this predominantly institutional market. If Big Bang can be described as the process by which the London stock ex-change poached business from other markets around the world through deregulation, then it was foreshadowed for many years by the growth of the unregulated and truly international Eurobond market, which chose London as its home because of its happy accident of time-zoning and the

Stock exchange officials Sir Nicholas Goodison, right, and Jeffrey Knight, with a computer terminal on Big Bang Day in October.

freedom it offered banks to do business in the market.

To stay in London, the Eurobond market has to be seen to be toeing the regula-tory line. But there are many of its members, notably the Belgisn and Luxembourg banks, which fail to see why they should, especially when their own home markets would be the first to benefit from any exodus from London.

The very idea of complete price trans-parency that screen trading would have implied would be anathema to the Eurobond market, where hage trading volumes are based on price discrepancies and the arbitrage of different credit assessments.

These are issues concerning the way business is done in the Euroboad market that may tax the AIBD. However, there are perhaps more fundamentally important changes occurring in the business itself. First and foremost, the 40 percent decline in the value of the U.S. dollar since the Group of Five agreement and the specter of rising American interest rates has drastically reduced the proportion of dollar fixed-income and floating rate note (FRN)

issues launched in the market. During the first quarter of this year only one-third of international bond issuance was denominated in dollars.

The FRN market has all but collapsed, its sudden demise foreshadowed late last year by a crisis of confidence in perpetual or undated floating rate ootes when Japanese investors (the major holders of perpet-ual ootes along with underwriting houses still carrying them on their books) started selling. Some issues, which like all FRNs are supposedly designed to trade at par value, declined in value by as much as 30

The major sovereign and bank borrowers have now deserted the FRN market as a whole, to the extent that some bankers speculate about a revival of the syndicated onn market, which the FRN replaced in the tidal wave of securitization of recent years. In the first three months of 1987. only \$1.9 billion of new FRN issues have been launched, s mere 4 percent of all new international bond issuance. Last year, Britain alone raised \$6.5 billion in the FRN market

On the other hand, the Euroyen market has been on the rapid ascendant, boosted by the yea's appreciation and the Japanese Ministry of Finance's continuing program of deregulation for the market. A total of \$8.95 billion equivalent of yen-denominaled international bond issues were launched during the first quarter of this year, firmly establishing the yen as the No. 2 Euromar-ket currency behind the dollar, in which a total of \$20.16 billion of issues were launched.

The prime beneficiaries among the Enrobond houses have been the Japanese securities houses. Nomina now sits atop the Eurobond lead management tables, dis-placing Credit Suisse-First Boston, the preeminent Eurobond house of recent years. The other three major international Japanese securities houses -- Daiwa, Yamaichi and Nikko - are all in the top 13. They are now pushing the idea that Euroyen issues should be registered for sale direct into the Tokyo market, avoiding the six-month lock-up period that prevails. Such a development would only serve to reinforce the underwriting strengths of the Japanese

It seems unlikely that all of the Eurobond market's established houses will be able to cope with these changes. Over the past few months a clutch of Eurobond houses have decided to give up marketmaking status in Eurobond instruments in favor of acting only on an agency basis. Others have announced that they were is pulling out of market-making in certain ectors, as with Orion Royal Bank's departure from the FRN market earlier this year. Still others are repositioning themselves to take better advantage of more lucrative developing markets such as that for internationally traded equity stocks.

But the Eurobond market is nothing if not innovative. When Japanese investo ditch the dollar, they look for other highyielding debt instruments to replace it. That has left scope so far this year for prolonged spurts of activity in the Euro-Canadian dollar. Eurosterling and the Euro-Australian dollar sectors, where coupons offer substantial yield pickups for investors over dollar bonds.

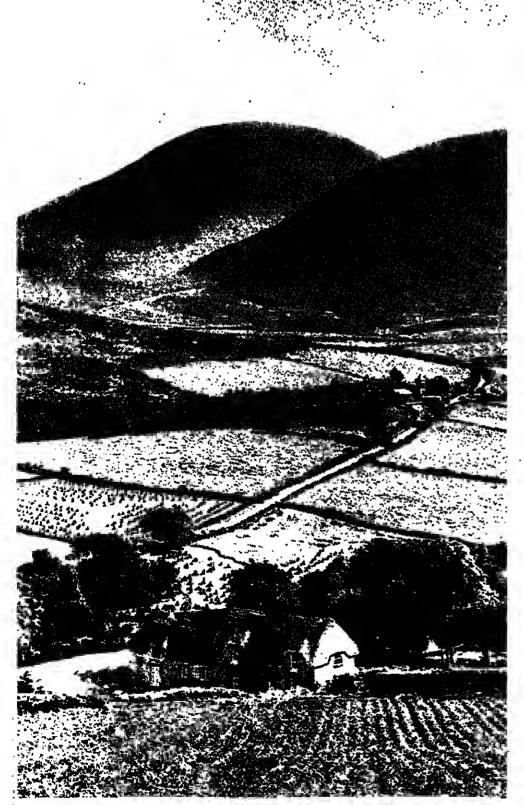

England. It probably conjures up images of green rolling hills. summer holidays at the seaside or perhaps week after week of cold grey rain. I certainly won't call to mind a land of tinancial security and generuus interest rates. And yet that is precisely what the Halifax is uffering.

HIGH INTEREST

Volume Soars on Gilts Market

Continued from page 9

hopes of gaining from the best aspects of each. Many feel, however, that it is inevitable that the auction will eventually wholly supplant the tap

The great thing about the tap system is that the British government decides when and at what price an issue of debi is sold into the market. A fixed price is set and tender offers are accepted. Issues are not always wholly allocated at launch, and the unsold portion goes back "on the shelf" and is then trickled out into the secondary market in blocks of varying size on a "up basis" when the Bank of England feels market conditions are ripe.

The drawback is that one market maker with muscle could corner the whole tap, or if the tap is too small, it would be difficult to divvy it out to all 27 market makers. Furthermore, the government can-

not always be sure of a regular source of cash. An auction does not allow the luxury of controlling the price and timing, but at least assures the Treasury the cash will be there. Auctions will also provide the full flavor and benefit to the gover of greater competition among the financial interme ries, namely lower interest costs and a wide distribution of its debt.

The new structure of the market has already produced some benefits to the investor comm Institutional investors say the market is now mo liquid, deals are said to be more efficiently exe and dealing spreads have narrowed. And best of all from the investor point of view, con quickly slashed to ocarly nothing. But at least until the competition is driven out of

the market leaving the strong to survive, wh good for the borrower and investor is not so good for the intermediary. Under the old system, the profits of the brokers came from the fixed commission they charged to their clients to buy the stocks from the jobbers. The jobbers in turn made their money from the modest markup on each turn as they passed the stock on to the brokers and in positi ning their inventories long or short a step ahead of the market, in the new market, commissions are either nil or

uscale, with about 90 percent of the trading on a net basis. Profits for the 27 market makers will now almost entirely come from positioning inventories ahead of interest rate movements or by constructing sophisticated swaps and arbitrage opportunities for their clients.

Volume, then, is crucial to profitability and winning market share has been the dominant strategic attack on the gilts market. U.S. firms benefit from extensive experience in the massive U.S. market, where an auction system may give them the edge if the Bank of England turns more to this system. The American firms are also better versed in arbitrage and risk management than their British competitors.

But the Americans seriously lack a distribution and placement base for the securities. Old client loyaltics have not died, and the mainline British conglomerates, especially Barclays de Zoete Wedd and Mercury International, which swallowed the two jobbing firms that had dominated gilts trading prior to Big Bang, still seem to be holding their own. The makeup of the primary market makers may eventually come down to a dozen or more players,

A jobber taking a break off the floor.

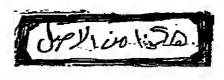

with no more than six to eight firms playing a really dominant role and the remainder taking up niche positions on the fringes of the market, such as in short-dates gilts or index gilts or in servicing a particular segment of the investor pool.

There is a glimmer of light on the otherwise gray and gloomy horizon. The U.S. Treasury man figures suggest that there is ample room for the gilt-edged market makers if they and the big institutional investors simply turn their inventories over at a faster rate. At least half the turnover in the United States is purely among the professional houses and the specialist brokers.

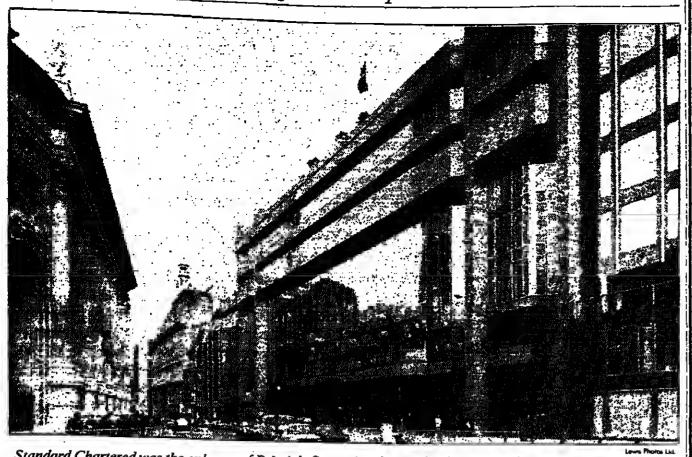

In London, six interdealer brokers, who provide the liquidity in the trading between the primary market makers, will play the same function.

The sophisticated use of options and futures to edge large positions and -or at least so the theory to -- lower the risk, means the market makers can

hold even larger positions and trade even faster. But ultimately, survival will much depend on the continued internationalization of the gilts market. Sterling volatility, largely due to political uncertainnes, has traditionally caused international investors to shy away from the gilts market. But If the Conservatives are returned to office, pent-up international mand, especially among the Japanese anxious to diversify out of the dollar, could well mean that the volumes will indeed soar, broaden the investor base and create room for more of the market makers to -survive, ...

Mergers and Acquisitions

Standard Chartered was the only one of Britain's five major clearing banks to report lower pretax profit in 1986.

Standard Awaits Lloyds Action

By Warren Getler

...

ONDON - The fate of Standard Char-

tered PLC, Britain's fifth largest clearing bank, continues to be the focus of speculation in the City. Having rebuffed a hostile bid from Lloyds Bank PLC last July, Standard may once again come under attack from Lloyds in three month's time following the expiration of a mandatory one-year cooling-off period im-posed under British law, City analysts said.

To bid or not to bid, that is the dilemma for Lloyds. The consensus among analysts in the City is that Lloyds is not going to lunge for Standard immediately after the July 12 cooling-off deadline. Then again, Lloyds might ultimately decide not to bid at all.

There are several reasons for Lloyds taking a cautious line.

First, the Bank of England has been con-ducting an investigation of lending practices at Standard — at the request of Standard's board. The Bank of England, which began its investigation in February, is exploring press allegations that suggest Standard was involved in imprudent lending to the National Bank of Brunei beginning last April, about a week after Lloyds launched its takeover bid,

Standard Chartered has denied all such allegations and insists on having its name cleared by the Bank of England investigation.

whose family owns more than 70 percent of the

National Bank of Bounci. Last November, the Brunei bank was shut down by Brunei anthonities. Officials in both Brunei and Singapore early last year had warned creditor banks, including Standard Chartered, that the Bank of Brunei was under suspicion for questionable accounting prac-

tices. If Standard's credit line to the Bank of Brunci were shown to be directly linked to Mr. Tan Sri Khoo's role in Standard's successful unst Libyds, bi deiense ag say, that could amount to a criminal breach of Britain's Companies Act. Bank of England officials have said that they do not expect to conclude their investigation unul year's end. Sources close to the bank have said privately, however, that they do not expect to discover any illegality, such as a breach of

larkei

Print Manual Print

HAL

1

the Companies Act, by Standard, Yet, they do not discount the possibility that Standard will be censured for "imprudent" lending to the Bank of Brunei,

If Standard is censured, market sources say, there will be strong pressure on Michael McWilliam, Standard Chartered's managing director, to resign. Mr. McWilliam declined 10 be interviewed.

"Lloyds won't go back for Standard Char-tered until the Bank of England concludes its inquiry," said Alan Broughton, a banking ana-lyst with Greenwell Montagu Securities in London

Mr. Broughton, echoing other analysts, also notes that "the quality of Standard's business" has declined since the Lloyds bid last year,

If no renewed bid from Lloyds materializes, Standard's share price is apt to drop precipitously.

suggesting that Lloyds may in the end not be interested in bidding at all at current Standard share prices.

Standard was the only one of Britain's five major clearing banks to report lower pretax profit in 1986. Standard's profit before tax dropped 5.2 percent to £253.9 million (\$431.7 million) from £267.9 million in 1985.

Whether Lloyds does launch a second bid will depend largely on the price being asked by members of a triumvirate of friendly shareHolmes a Court, with a stake matching that of Sir Y.K. of almost 15 percent. Current market wisdom here is that Lloyds

will have to offer somewhere near £9 a share to obtain the substantial stakes of any one of these three minority shareholders and thereby open the gates to a full takeover. But with Standard's current share price hov-

ering around \$35 pence, just 15 pence below the 850 pence per share cash offer by Lloyds last year, there is considerable doubt whether Lloyds will feet such a price is justified. There is also some doubt that Sir Y.K., a

Standard board member who has been a supporter of Standard's extensive presence in Asia for years, is anxious to see Lloyds obtain control of Standard at any price.

Moreover, speculation has grown that Mr. Holmes à Court has ambitions of his own for Standard, where he also sits as a board director. Australian brokers have been suggesting that the Australian business maverick is out to merge Standard Chartered with Hill Samuet, the British merchant bank, in which he has also acquired a substantial minority stake. How he would arrange the seemingly awkward marriage is anybody's guess, In the end, if no renewed bid from Lloyds

materializes, Standard's share price is apt to drop precipitously and leave the triumvirate with considerable losses on their Standard investments.

Mr. Broughton, the Greenwell Montagu an alyst, said that the group paid an average 830 pence per share for their stakes in Standard last summer. "The only thing keeping the current price of Standard's shares at such high levels of 830 pence is the continuing speculation that Lloyds will come in and bid at a price higher than what it offered in July 1986," he said.

"But if that doesn't happen, we could see Standard's share price plunge to £7, leaving some heavy paper losses." In the meantime, Standard officials have let

it be known that their chief priority is improving profitability, particularly in Asia, and that they will not allow themselves to be preoccupied with market talk of another takeover bid by Lloyds.

But as one analyst, who asked to remain

Scandals Fail to Stem Takeovers

By Jeff Ferry

- ONDON --- The recent series of financial scandals in the City of London, including the Guinness affair, is having a surprisingly small impact on the city's takeover boom, according to the

The City's takenver boom, according to the major players in the market. Figures compiled by the Acquisitions Monthly magazine show that in the first quar-ter of 1987, there were 55 new public bids, compared to 51 in the same period of 1986. However, the total value of the bids, at £2.9 hillion (\$4.9 billion), was substantially less than the comparable figure for 1986, £7.8 bil-

There was a momentary slowdown in activ-"There was a momentary slowdown in activ-ity in December and January, when the Guin-ness scandal first broke," said Philip Healey, editor of Acquisitions Monthly, "but since then, it has picked up. In April alone, there were 30 announced bids." Hostile takeover bids, however, have been much less in evidence. Some investment bank-ere autibute this to their political empirication.

ers attribute this to their political sensitivity. suggesting that there will be an upsurge in hostile bids once the impending general election is past.

Morgan Grenfell, the merchant bank embroiled in the Guinness affair, remains the league leader so far this year, handling 14 bids in the first quarter. In January, three Morgan executives, includ-

ing the chief executive, Christopher Reeves, resigned over the bank's involvement with Guinness. The new chief executive, John Craven, assumed the reins on May 5.

Richard Webb, head of corporate finance at Morgan's since January, foresees little change in the bank's aggressive approach to mergers and acquisitions.

"We have always felt very strongly that we must try our hardest for our clients, and I don't think that will change dramatically," he said. "Perhaps there will be a bit less emphasis on

the star system, and a bit more of a team effort, but it's really only a question of fine tuning."

he added. Mr. Webb said that he did not expect this sound the 1986 year's total takeover activity to equal the 1986 figures, which he said were exceptionally high. "In terms of corporate finance profits, 1986 was an annus mirabilis," he said. "I expect

total foe income to be significantly less this year, widely across the City."

ment banks were making smaller inroads into banks were making summer and the

Top 5 U.K. Takeovers

British merger activity than many had feared a

ar ago. "The Americans do not seem to have been so noticeable so far this year," said Michael Gatenby, head of corporate finance at Charterbouse. Charterbouse captured the No. 2 spot in merger and acquisitions rankings for the first quarter, an achievement that Mr. Gatenby attributed to "a lot of hard work in getting close to the targe, acquisitive companies." Richard Kelly, head of First Boston's Lon-

don mergers and acquisitions group, agreed that American investment banks are taking a gradual approach to the British market. "In the long term," he said, "if you do well

with your clients and prove your expertise, you build up business. We like to think our style lends itself to complementarity with a U.K. merchant bank."

Mr. Kelly cited recent First Boston successes, including working with British merchant bank Samuel Montagu on Argyll Foods' £660 million acquisition of the Safeway supermarket chain, and with Hill Samuel on Beechams' divestiture of its home improvements division. Mr. Kelly said he thought the scandals and

investigations were among the factors hastentear, widely across the City." British bankers said that American invest-والمراجع والمراجع والمتراجع والمتراجع

"Clients are putting a premium on trust. confidence and a long-term commitment from a bank," he said.

Evidence from another Acquisitions Monthty survey suggests that insider trading in London is still going on. A study of price movements in 100 bid target companies during the second half of 1986, in the four weeks before the bids being announced, revealed that in 23 cases, the stock rose by more than 20 percent. Some price movements were as much as 40 10501

"Some of it you can understand as guess-work," Mr. Healey said, "but the rest you can't. These figures show that insider dealing is still flourishing."

A British Department of Trade investigator recently said publicly that he knew of two separate insider dealing "rings." He said one of them had made profits of £10 million. Charges have yet to be announced.

"The Acquisitions Monthly data is very good circumstantial evidence of insider dealing," commented a senior regulatory official who asked not to be identified.

INTERNATIONAL HERALD TRIBUNE, THURSDAY, MAY 14, 1987

Foreign Exchange Market

POINT OF VIEW

Rewards High for Strong of Heart

By Ken Ferris

ONDON - The foreign exchange market in London dwarfs other centers around the world - and that includes New York and Tokyo. This dominant position means the City can offer high rewards to banks that are brave enough to speculate in the volatile markets.

The main players in the London market have consolidated their positions through investment in high technology equipment and the high-flying traders who use it. The large volume of funds switched between different currencies provides ample scope for dealers to profit from commissions on corporate business and speculative posi-tions them in the macher tions taken in the market,

The Bank of England has estimated that the average daily foreign exchange turn-over in London is \$90 hillion. That compares with \$50 billion in New York and \$48 billion in Tokyo, according in surveys con-ducted by the Federal Reserve Bank of New York and the Bank of Japan.

The real strength in the London interbank market lies with the large domestic banks. A recent survey by Euromoney magazine shows that Barclays Bank has taken over the top position from Chemical Bank. Close behind are Midland Bank, National Westminster Bank and Citibank.

There are no published figures showing bank earnings from foreign exchange in individual money centers. But London's dominant position in the foreign exchange arena means that each bank does a large proportion of its business - and, therefore, earns a sizable chunk of its foreign exchange profits - in the City.

For banks who make the right calls, the payoffs are considerable. Citicorp, the largest banking group in the United States, accounts for the lion's share of the world currency market. Its earnings from foreign exchange jumped to \$412 million last year from \$358 million in 1985. This represented almost 5 percent of the group's total

Barclays, the largest European bank in the business, also boosted earnings last year to £123 million (\$209 million) from £113 million in 1985. Midland Bank's return jumped to £110 million in 1986 from £80 million the previous year. National Westminster Bank also saw earnings rise sharply to £110 million from £44 million in 1985. At Chemical Bank the increase in foreign exchange revenues was less spectacular, Earnings rose from \$102 million in 1985 to \$103 million last year.

The profits boom follows the decision by most of the major banks in the early 1980s to make a large investment in the equipment and personnel needed to run an increasingly sophisticated and technology-

dependent dealing operation. The foreign exchange business in Lon-don is now firmly driven by interbank trade rather than customer demand. This means that the key component in any bank's trading strategy is the skill of its human capital. Being on the right side of a

sharp move can do a lot for profitability. But what about the risks? Have they increased in a period that has seen the

The Bank of England found that trading in futures and options accounted for only I percent of daily average volume in London.

The London branch of Algemene Bank Nederland.

dollar rise to 3.45 Deutsche marks and 263 nior manager with responsibility for op-tions and special products at Barclays yea in February 1985 before falling to current levels of less than 1.80 marks and Bank. "There have been whipsaw moves 140 yea under the weight of record U.S. over the last 12 months, but not as regular-ly as before. Large movements within a trade deficits? trading day are the worst kind to have to avoid."

"Volatility may have increased, but the risk of loss isn't as great as it was in the early 1980s," said Steve Mazloumian, serisks now than they were a few years ago," noted Michael O'Brien, managing director of foreign exchange in London and Europe at Goldman Sachs, the U.S. investment bank that has established itself among the upper echelon in the foreign exchange husiness.

"In periods of greater volatility people don't take the same positions. This means they are more likely to be able to handle be added.

The investment banks have been drawn into the foreign exchange business in London and other major centers because the growth in their capital markets activity has made it necessary for them to transact the currency side of a growing number of deals. They need to be in foreign exchange because their clients have exposures they want to hedge as a result of transactions on the securities side.

The major commercial banks do not see the investment banks as a threat. Indeed some argue that their presence has boosted liquidity in the London market.

"The market has grown as a whole so they aren't taking business away from us," said Robert Loewy, foreign exchange man-ager at Chemical Bank in London.

Nevertheless, competition for corporate orders in the London market is tough. The presence of large numbers of banks willing to make markets in most of the major currencies has forced them to trade on finer margins and narrower spreads as they bid to attract business from sophisticated customers.

Some banks are even prepared to quote prices on which they actually lose money so they can hold onto customers or increase volume. However, most of the major banks believe "buying business" is a short-term

strategy that rarely pays dividends. "Some of our competition have begun to make markets on such ludicrous prices that they can pick up corporate business," said Mr. Loewy. "The problem is they do it once and then lose the customer. We have retained our position in the market hy

quoting consistently." The advent of increasingly sophisticated foreign exchange related instruments, such as futures, options, swaps and a range of hybrids, from participating forwards to compound options and swaptions, has also alerted the anthonities to the dangers of trading in off-balance sheet items.

The Bank of England imposes limits on the exposures that banks may take in the market, while the banks themselves adhere to their own daytime and overnight limits. But the question of how to cope with exposures caused by trading in the newer instruments is of increasing concern to the regulators.

The importance of off-balance sheet financial instruments in the foreign exchange business is often overstated, however. The Bank of England found that only I percent of daily average volume in London was accounted for by fatures and options. Spot transactions contributed 73 percent of turnover and forward contracts out to one year represented 26 percent.

KEN FERRIS is editor of Euromoney Treasury Report.

City Meets Challenge Of the Big Bang Era

By Lord Boardman

ONDON — I see the Big Bang and its after-math in the City of London in a global context and part of the evolution of the

financial services industry. New advances in technology, shifting patterns of global capital flows and a plethora of new financial instruments had all heightened the pace of liberalization in the major international financial markets of the world. So it was only a matter of time before financial assets became as easily traded and moved around

the world as any other commodity. London has successfully taken up that challenge

and, with Tokyo and New York racing neck and neck to become the largest equity market in the world, the City has reaffirmed its claim to be the leading financial center in the European time zone. In fact, the process of deregnlation in London has

been faster and more courageous than in any other financial market. As a result, it is the most cosmo-politan center and, probably, the most competitive. There are more than 460 foreign banks in London — more U.S. banks, it is said, than in New York City - and they are competing with British banks, securities houses, insurance companies and other institu-

tions for corporate and private business. At this point, there is no discernible decline in the City's attractions for financial services operators, and its future - like that of the banking industry -

looks demanding but good. A central role in that future is occupied by the application of sophisticated electronics. Indeed, my office close to the heart of the City is within what must be one of the greatest concentrations of electronic hardware in the world, which each working day sustains and fuels London's international mar-

But while the flashing screens have helped to stimulate the City overall, they have claimed at least one major casualty. The floor of the London Stock Exchange is now no longer the bustling hub of securities trading. Instead, screen dealing rules.

The needs of corporate and private customers have changed, too. Today's corporate treasurer has to be offered a wider range of financial options and providers of such services need a more specialist. flexible, global approach. That often means finding solutions from the capital markets as opposed to traditional sources of credit. I do not, however, see the concept of relationship banking being over-hauled. On the contrary, I see the introduction of a capital market capability as one that complements our mainstream commercial banking activities.

In the personal sector, the surge of interest m share ownership in Britain coincides with a desire by financial institutions to take a fresh look at the way in which people's investment needs are served.

A very encouraging aspect of the recent wave of stock market flotations has been the number of firsttime investors. In less than two years, the size of the shareholding public has doubled. With new investors and new institutions in the marketplace, the need for effective regulation and supervision has become paramount

In London, the principle of self-regulation within a statutory framework forms the cornerstone of government policy for the new markets. Self-regula-tion is, I believe, a more mature approach in that responsibility for upbolding standards falls firmly on the shoulders of the financial community itself. Additionally, the ability to handle business with

ly a minimum of bureaucratic hurdles is an estabished strength of the City's markets that has en-abled growth and encouraged the flexibility neces-sary for fast-moving global transactions. I have no doubt that London as a financial center can only

thrive if it upholds this principle and retains its reputation for bonest dealing and integrity. The issues surrounding regulation and supervi-sion, of course, go beyond the domestic situation in the United Kingdom. With global financial markets, the question of supervision is also global. Central banks around the world have to ensure that the financial antegrity attacks of the second supervision of supervision. financial system remains robust, particularly as in-novative financing techniques become more wide-spread. The risks have to be identified and managed. The risk-management challenges of the post-Big Bang era have, rightly, been seen as new opportuni-ties by the British banking community and have opened up business avenues from which there is no turning back.

Deregulation has been faster and more courageous here than elsewhere.

The recent joint U.S. and U.K. consultative paper on capital adequacy signals a major step forward. The overall sim is not to create complete harmony in the rules that each country applies, but to set minimum standards.

My own view of the accord between the Bank of England and the Federal Reserve Board, which covers the definition of what should be regarded as capital and how it should be measured, is that it is a step in the right direction. But I do have a few reservations. In Britain, the issue of capital adequacy has never been purely mechanistic. By adopting minimum standards for primary capital we should not ignore the virtues of the subjective and qualita-tive way in which the Bank of England has approached supervision in the past. The Bank of En-gland should not be tempted to tip the balance in favor of across-the-board mandatory capital ratios.

I hope that the authorities in other parts of Europe and in Japan will consider using the U.S.-U.K. proposal as a basis for formulating a multilateral approach; the proposal was not intended to be an exclusive arrangement. Changes in the financial services industry have

brought new challenges for supervisors, financial stitutions and customers all around the world. Deregulation has created a climate of intense competition not just for institutions but also competition between financial centers. I am convinced that London has the unique concentration of people with financial skills, institutions with immonse capital strength and an unparalleled sophistication in tech-niques — human and electronic — that are required for markets today and in the future.

LORD BOARDMAN is chairman of National Westminster Bank PLC

S

Diversification, Growth in Eurocommercial Paper

of 1986, programs totaling \$60.75 billiou had been signed, com-pared with \$29.6 billion the year By Krystyna Krzyzak ONDON -- The Eurocombefore and only \$12.6 hillion in mercial paper market 1984

"Market makers are more able to control

Outstandings (the amount ac-tually drawn on those programs) were around \$30 billion, more has been one of the London-based Euromarket snocess stories. By the end than double the amount 12 months carlier.

A wide spread of borrowers is now tapping this market. They include industrial corporations, insurance companies, bank holding companies and sovereigns such as Denmark, with a \$1 billion program, and Belgium, which recently announced an un-

limited program. In terms of announced programs, U.S. enuities continue to dominate the market, accounting for nearly 30 percent of it. Many of these view their programs as a funding alternative in the U.S. commercial paper market and in a large number of cases did not use the Euromarket to any signif-icant extent because U.S. rates have been substantially cheaper. However, Eurocommercial paper has advantages for U.S. bor-rowers beyond an occasional cheap cost alternative. Large borrowers tap it because they can extend their investor base. In the United States, the market is dominated by the giant institutional investors, such as the money mar-

U.S. entities account for nearly 30 percent of market.

ket and pension funds; in the mercial paper cannot be used to Euromarket, corporations play a finance acquisitions. Eurocommercial paper is not

significant role, accounting for about 25 percent of purchases. the only short-term instrument The most significant arrival in occupying the attentions of the London financial community. this market has been General Motors Acceptance Corp. GMAC has put no limit on its Last April, sterling commercial paper was launched, a market for Eurocommercial paper borrow-ings. In the United States, it acwhich many British corporate treasurers have been lobbying incounts for about 10 percent - or tensely. \$35 billion -of total borrowings, This has seen a more modest and it is widely accepted that the growth, with around 45 ancorporation may aim to capture a

nounced programs by the end of last year, totaling around £3.5 bilsimilar amount in the Euromarket. Certainly, its borrowings lion (\$5.9 billion) in volume but have been significant, peaking at around \$1 billion in September. £520 million in borrowings. Sterling commercial paper has been fraught with legal and tax prob-lems, with what many see as over-The establishment - and use of large programs has been one

of the growing trends of the mar-ket, and one which has given it its recently acquired depth. Barroughs Corp., for instance,

set up a facility to finance its merger with Sperry Corp. It chose faces competition from the bank-Eurocommercial paper in preferers acceptance sector, one of the ence to its domestic market becheapest cause publicly offered U.S. comsources of short-term finance available to British company partly because of its use by the Bank of England as a tool of monetary policy.

Bankers acceptances are par-ticularly competitive in the oneto three-month tenor, and notably so toward the end of the calendar year, which accounted for

the tailoff in sterling commercial paper borrowings in December 1986, down from a peak of £700 million the previous month. Not all British companies are cligible in use bankers accep-

tances, which require an underlying trade transaction (property and insurance companies, for example), and these were among the first to announce programs. That said, the market has proved particularly popular with the British

retail companies, which have scasonal short-term cash requirements that the instrument can easily satisfy. Both the Eurocommercial and

sterling commercial paper mar-kets have provided hotbeds of enthusiasm by the authorities to competition for the Londonbased dealers, with a high degree of prestige at stake. In the Europrevent the paper from landing in the hands of the nonprofessional commercial paper market, in par-Sterling commercial paper also ticular, around 80 institutions are involved in one or more programs, compared with six invest-

share of the U.S. market.

ment banks that have the lion's

Dealerships in the Eurocommercial paper market are concentrating, however, among the top 10 to 15 banks. And while the market has not seen anything resembling the post Big Bang re-trenchment among some equities market makers, borrowers are beginning to review their bankers more stringently.

Last year, Merrill Lynch was dropped by the Australian Wheat Board and Den norske Creditbank, and Credit Suisse First Boston lost its place on Prudential Funding Corp.'s and Com-monwealth Bank of Australia's facilities. These banks are, however, among the leading dealers in the market.

In a high-volume, low-margin usiness, success is ultimately determined by the investor base that the banks have built up.

In the past, many survived by taking paper into their inven-tories and selling it when interest rates fell. That escape route is now closing, and the market is moving more toward genuine end placement. The shakeout long & predicted by many of the leading bouses may not be that far away.

KRYSTYNA KRZYZAK is deputy editor of Euromoney Corporate Finance

Recovering From Perpetual FRN Fiasco

- and subsidized -

By Jeff Ferry

ONDON - The constant development of new instruments and the adding of the proverbial "bells and whistles" to existing finan-cial instruments that has characterized the Euromarkets in recent years is continuing. London bankers say. This is despite the serious setback of February's liquidity crisis in the perpetual floating rate note market.

An unexpected rush to sell perpetual FRNs that began in November 1986 and culminated in a seizure of the market in February made the \$18 billion face value of perpetual FRNs unmarketable. Estimates of the losses run as high as 18 percent, or \$320 million

According to David Andrews, a director at IBCA Banking Analysis, Japanese banks, holding around two-thirds of the FRNs, were the hardest hit. The underwriters of the notes, including the London banks Morgan Guaranty, Salomon Brothers and Credit Suisse First Boston, are also rumored to have taken significant losses. Mr. Andrews believes the significance of the perpetual FRN fiasco is that many of the new instruments could carry risks that are not properly appreciated by the marketplace.

New instruments are priced with a lot of high-powered math and computer models to estimate the risks, he said. But when reality struck and nobody would deal in them, it proved that the calculations were all nonsense, he added.

"What it shows is that you can have the most elegant mathematics in the world, and until something goes wrong, you don't actually know what the risks are," he said. G. Edwin Smith, underwriting manager perpetuals crisis, innovation is on the de-cline.

warrants and on Australian dollar bonds as other examples of investors' getting burned by innovation.

bank's new issues syndication department, disagrees.

Mr. Berman added that demand has been strong for currency warrants, notably in the dollar/yen and dollar/Deutsche mark market,

"When people feel exchange rates have reached a critical point or a turning point," he said, "a currency warrant can be a cheap way of hedging against a currency move-ment or of taking a punt on it."

"Euro-medium-term notes will change the way people handle their medium-term assets, just as Eurocommercial paper revo-hutionized the way investors handle their short-term assets," he said.

"The Euro-medium-term note market is now at the same stage the Eurocommercial paper market was at two years ago," he added

John Lawrence, swaps and options trader at Paribas, was also bullish on the new instruments

"Interest in new instruments in the past six months," he said, "is probably greater now than at any time in the past couple of years. With interest rates low, investors are keen on anything that can improve returns above a straight conventional bond."

Mr. Lawrence cited strong interest in currency and gold warrants and a rapid growth in the market for tradable caps on dollar and Deutsche mark debt.

"A cap is a synthetic way of creating a long-term fixed rate," he said. "It gives hability managers the ability to borrow sixmonth money and protect themselves against interest rate rises for two to seven Ŀ YCATS OUL

Richard Sharp, underwriting manager at Goldman Sachs' London office, said that the perpetuals crisis has had a significant but limited impact on investor psychology.

There is still ample room for innovation in places where the market has been relatively unimaginative," he said.

"We did a \$500 million floating rate note for the Prudential, which was a collatoralized mortgage obligation (CMO), and in was very successful," he said. "Since then CMOs have taken off, right through the crash in the [perpetuals] market."

Traders argued that the perpetuals cul-lapse was a special case.

"The concept on [perpetuals] was funda mentally wrong," said Mr. Berman of Citi bank. "There was too much supply to soon, and what wasn't stuffed down the throats of Japanese banks was left on deal ers' books. That's always a dangerous situ ation."

WALL STREET WATCH

Steel Stocks Begin to Show Rose 0.1% Their Mettle on Wall Street In April

By VARTANIG G. VARTAN New York Tumes Service

EW YORK --- When LTV Corp., the second-largest U.S. steelmaker, filed a bankruptcy petition last July, shock waves went through an industry already facing intense price competition and sluggish demand. The move raised fears that LTV could emerge as the industry's lowcost producer, and share prices of competitors plunged by onehalf to three-quarters.

But investors who scrapped steel issues last summer might regret that decision now. Last week, the stocks of Bethlehem, Inland and USX - along with shares in Armco and Lukens, among others - traded at their 52-week highs.

with a steady decline in steelmaking capacity, all of which have vasily improved some companies' earnings outlook. Money managers, forthermore, are purchasing com-modity-related stocks that stand to benefit from a whiff of inflation as well as a cyclical upturn in the economy.

Wall Street analysts, too, have been taking a more kindly look at the industry. Last week, Smith Barney, Harris Upham & Co. added USX to its recommended list on the advice of George D. Baker, the firm's domestic oil analyst. USX now derives more than 70 percent of its revenues and cash flow from oil, thanks to its ownership of Marathon Oil and Texas Oil & Gas. One major

company problem last year was the decline in oil prices. Since Smith Barney is bullish on oil stocks as well as cyclical stocks, USX would seem to be a natural choice. Mr. Baker set a target price in the mid-\$40s for the stock over the next 18 to 24months. On Tuesday, USX closed at \$32.25 on the New York Stock Exchange, compared with \$14.50 last August. Prudential-Bache Securities also likes USX, calling it a "for-

merly moribund steel giant that has transformed itself into an asset-rich, well-managed and competitive diversified energy company." The firm estimates that per-share earnings will leap from 75 cents in 1987 to \$2.80 next year. Michelle Galanter Applebaum, the steel analyst at Salomon

Brothers, first put USX on her buy list in mid-January at a price of \$24. The long United Steelworkers strike against USX ended in February and the new contract, Ms. Applebaum said, "provides for significant cost advantages versus USX's competitors" and should allow USX to be profitable by the third quarter of 1987.

B UT Charles A. Bradford of Merrill Lynch recently jumped off the USX bandwagon, after favoring its purchase for a time in 1986. "As stock prices move up, 1 like to lower my ratings," he said. "When things look attractive in the steel industry, these stocks respond quickly. But I think you should buy them when prospects are bleak."

Peter F. Marcus of Paine Webber issued two recommendations last week. The analyst went from "neutral" to "buy" on Inland. Steel, which he regards as a low-cost producer with considerable operating leverage. Inland closed Tuesday at \$31.25, compared with \$14,50 last July.

He also strongly recommended Bethlehem Steel "as a trade." because of its even greater sensitivity to swings in steel prices. "But I kept Bethlehem at a neutral rating," he said, "because the company has more than \$60 a share in retiree liabilities for pensions and group insurance." Bethlehem Steel was up to \$14,625 Tuesday from \$4.625 in December, but still below its \$22 trading price in March of last year.

Inland is the other steel stock -- recommended last November at 520 - that Ms. Applebaum favors. She, too, cites Inland's operating leverage and estimates company earnings at \$3.28 a share for 1987 and at \$4.99 next year.

Mr. Bradford, the Merrill analyst, names Armco (at \$12.125 on Tuesday from \$4,125 last year) as his current favorite. The company lost money from 1982 to 1986, but the analyst estimates profits this year at 50 to 75 cents a share and \$1 a share in 1988.

This turnabout reflects surging orders and higher prices, along Investors who sold steel issues last summer might rue that decision now.

Compiled by Our Staff From Dispatches WASHINGTON - U.S. retail sales inched up a meager 0.1 percent in April, the Commerce Department reported Wednesday. Some economists said the sluggish growth reflected the cautiousness of consumers who are short of

spending money. Analysts had been predicting an rease closer to 0.6 to 0.8 percent The March sales figure, however, was revised upward to 0.8 percent from the 0.2 percent earlier report-ed. Some experts said that the higher March figure may have absorbed some of the expected April gain.

Auto sales were down 0.9 per-cent from March levels, while sales of furniture and home furnishings were down 1.4 percent. Nonanto sales were up only 0.4 percent.

Some economists said that the report not only showed a tiny gain, the increases reflect rising prices rather than more spending.

In the more important areas of durable goods, consumers stayed away. They were buying fewer cars and less furniture, apparently un-willing to shoulder more debt for discretionary purchases.

"It's a pretty weak report. Very weak, as a matter of fact," said Michael K. Evans of Evans Economics, a Washington consulting firm. "I really think that consumers have given up. They don't have the money, and they're not borrowing

anymore. Wages and salaries are not keeping up" with prices. The White House spokesman, Martin Fitzwater, maintained without elaboration, "Retail sales are looking good."

While the month-to-month fig-mes showed little movement, the department said longer-term fignres were more encouraging.

April sales were 5.9 percent above April 1986 levels, with car sales up 5.4 percent and nonauto sales up 6.0 percent.

In a separate report, the Federal Reserve Board said Wednesday that one in five U.S. banks posted losses last year and many of the others suffered declining profits, mostly because of bad farm and energy loans.

By comparison, the study said, only 4 percent of banks had losses in 1979, 8 percent in 1982 and 17 percent in 1985.

ministries' requests.

By Susan Chira New York Times Service

TOKYO - In an effort to halt the yen's rise, Japanese government officials summoned major Japanese participants in the foreign exchange market on Wednesday and asked them to refrain from speculative currency trading.

The request, which Finance Ministry officials called "moral persuasion." sent the dollar up slightly and stock prices down sharply in Tokyo. Officials said that the request was not part of a coordinated effort with other countries. Finance Ministry officials said

> The dollar was little changed before the release of U.S. trade figures. Page 21.

the companies concerned did not have to heed their advice, but one foreign hanker said the ministry was following up its request with a requirement that banks report their trading positions to the ministry, which would allow officials to de tect speculative trading. In Japan, such "administrative

guidance" has proved a powerful tool. Although compliance is voluntary, most companies do not

want to alienate their regulators. But it is not clear whether such persuasion will work in this case. falls in New York, for example, it is further," he said. likely to keep falling in Tokyo.

Computers Bloom in Flower Trade Dutch Automate Their Markets to Maintain Exports By Ronald van de Krol Special to the Herald Tribune AALSMEER, Netherlands anything else.' Every weekday morning, in the time it takes most budding flower arrangers to craft one floral display, 12 million cut flowers and one million house plants will change hands in a cavernous costs auction hall in this town outside

Amsterdam. Similar scenes are repeated at smaller auctions throughout the

One of several auction rooms at

country. Ever since the tulip was introduced into their country from Turkey more than 400 years ago, the Dutch have ruled the world flower market as firmly as Britannia once ruled the waves. To protect that dominance into the next century, they have turned to a relatively new tool - the comonter.

Every weekday at 10 A.M., in the "high-tech" flower auctions around the country, computers sort, catalog and otherwise track consignments of roses, tulips and orchids and speed them on their way to all-important export markets.

Each year, Aalsmeer alone processes 900 million roses in 80 varieties, 250 million tulips, 200 million carnations and 120 million chrysanthemums, not to mention millions of begonias, poinsettias and azaleas.

Without the aid of computers, auction officials say, the market would be overwhelmed. "We'd have no hope of keep-

ing track of the flow of flowers if the whole system weren't com-puter-based," said Adrienne Lansbergen, the Aalsmeer auction's spokeswoman. "The num- complex, which covers an area

bers have grown too big to do the size of 55 soccer fields, includes a special liaison department for especially large orders. Such efficiency cuts costs. "If a supermarket chain wants a helping the Dutch maintain a few thousand ferns all of the comfortable lead over rivals in Colombia, Israel, Spain and Kesame size, we can put them in tiya, where growers are hiessed touch with the right growers." with better weather and lower she said. Housed in a large area below

It also means the freshly-cut

Tokyo or Sydney later that same

day or early the next morning. And the staggering size of the turnover means individual growers can afford to specialize in certain flowers, unlike horticulturists in other countries who need to produce a number of

different flowers to ensure an ad-"Some of our growers produce only lilies or only irises in all their varieties," Mrs. Lansbergen said. "Buyers know they can always get the kind of flower they ket. need in just about any quantity

Acondon Court Dismisses Request on ITC Receiver Reuters LONDON — A British court dismissed Wednesday a request to appoint a receiver to recover debts from the 22 member states of the insolvent International Tin Council. Maclaine Wotson, a Londoo Metal Exchange dealer, last month asked the London High Court to appoint o receiver for million (S10 million at current rates) he is uwed by the ITC, a cartel of major consumers and produc- res. The judge ruled, however, that the ITCs rghts concerning its members were derived ite jurisdiction of British courts. The ITC owes £900 millico to creditors be- cause of its efforts to prop up the tim market after the LME, the major forum for tim trading, halted drating in the metai in October 1985. Dealing scopped because the ITC ran out of money to finance a buffer stock, which kept tim money to finance a buffer stock, which kept tim	Spain, Portugal to Seek Membership in EMS Reaters STRASBOURG, France – Spain and Portu- gal, which joined the European Community in 1986, are eager to join the European Monetary System, their central bank governors said Wednesday. Only eight of the 12 EC states have joined the EMS currency mechanism, aimed at promoting stability among EC currencies. Spain, Portugal, Britain and Greece do not have full EMS mem- bership. The system allows currencies float against each other within agreed limits, where central banks are required to keep them. The Bank of Spain's governor. Mariano Ru- bio, at a meeting at the European Parliament, suggested 1989 as a target date for Spain's entering the system. By then, Spain could have completed economic adjustments needed to bring its monetary policies more in line with other members, he said. The Bank of Portugal's governor, José Ta- vares Mareira, said Lisbon would have to work toward ending a disparity between its economy and others before joining the currency float. He

MD-11s Ordered By Dragonair

Agence France-Press LONG BEACH, California — Dragonair, based in Hong Kong, has ordered two McDonnell Douglas three-engine MD-11s and taken an option on a third, the U.S. manufacturer has announced.

The first plane is to be delivered in January 1992, McDon-nell Douglas said Tuesday. The order's value was not disclosed. Dragonair files to China and Thailand. It has obtained landing rights in Guam, Bangladesh and Nepal. The MD-11. successor to the DC-10, has a range of 8,000 miles (12,750 kilometers) and can seat 245 to 405 passengers.

pursued by union leaders. Robert Joedicke, an airline analyst for Shearson Lehman Brothers, chief executive of Allegis, said at a said the agreement, which revised recent news conference that the an airplane transaction reached in move by the pilots had made Allelate 1985, put a substantial "chunk

gis more vulnerable to a takeover. Several analysts noted that it was unusual for an airplane maker to be given such a large stake in an air-He said there was little chance

Boeing would seek to take over Whether the agreement between Allegis.

Such a combination is prohibited by U.S. laws going back to the Air Mail Act of 1934. That law curbed Under the arrangement, Boeing Mail Act of 1934. That law curbed provided United with \$700 million connections between airlines and in financing and in return received manufacturers that supplied them notes that it can convert at any time

with planes, engines and parts. for 10 million to 11 million Allegis" The act forced the precursor of shares, depending on the price of United Airdines, United Aircraft & Transport Co., to break into three Boeing could instead convert the operating companies: United, notes into 1.4 million shares of a Boeing and Pratt & Whitney, now a new series of Allegis preferred stock that United values at \$500 a unit of United Technologies Corp. Under the original 1985 arrange-ment, the United could order as share. Allegis has around 70 million common shares outstanding. many as 110 Boeing 737s and six 747s for a total of \$3 billion. The Bocang's stock closed Tuesday at \$45,25, up 12.5 cents, on the New York Stock Exchange. Allegis end. ed at \$67,75, up 50 cents, but by midday Wednesday had fallen \$100 cents for a total of \$3 billion. The revised transaction is for 36 planes. 15 of them long-range 747-400s, to be delivered by 1995, and 21 737-300s, to be delivered by 1991.

United said some of the 747s would be used to replace older planes it inherited when it bought

percent to 462 million DM.

Helena, which trades agricultur-al chemicals, had revenue of \$444 million in 1986. Mr. Strenger said

On April 5. United's pilots' planes it inherited when it bought union announced that it would the Pacific routes of Pan American seek to buy United for \$4.5 billion. World Airways.

Allegis stock began to trade beavily and rise on the possibility that United would be sold. The tition from other airlines that have Allegis board decided against the ordered new aircraft.

SAS Postpones **Decision** on Jets Richard J. Ferris, chairman and Until September

> Reulers STOCKHOLM - Scandanavian Airlines System said Wednesday that it had postponed until September a decition on a major order of new icts as talks continue on a possi-ble collaboration with Sabena

Belgian World Airlines. In December, SAS signed a letter of intent to buy 12 Mc-Donnell Douglas MD-11 airlin-ers for 10 billion kronor (\$1.5 billion), but later threatened to cancel the order after receiving a lower bid from Airbus Industrie, the European consortium.

A spokesman said the airline was also considering replacing DC-10s on its intercontinental routes with a new long-range version of Boeing Ca's 767 model. SAS would not give details of the Boeing bid. Airbus's long-range A-340 model is also in the running.

The spokesman said that the final selection would depend on "joint fleet planning" with Sabena, which also uses DC-10s for its long-range routes.

The two carriers have been engaged in talks for some time simed at a merger or other co-operative effort that would counter mounting international airline competition.

ny - Bayer AG reported Wednesday that group pretax profit in the first quarter rose 3.2 percent, to 715 million Deutsche marks (about \$400 million at current rates) from 693 million DM in the first quarter of 1986.

The company said the improvement had been achieved despite a 9 percent decline in sales, to 9.46 billion DM from 10.39 billion.

World group 1986 net profit rose: 3.8 percent to 1.49 billion DM against 1985. Sales fell 11.3 percent to 40.75 billion, as had been reported previously. Bayer will propose an unchanged 10-DM dividend.

Hermann Strenger, the manage-ment board chairman, said the company expected earnings and volume sales for 1987 to be around last year's levels.

The drop in world sales in the first quarter was due to the mark's strength, he said. The group's oper-ating profit fell slightly because of the mark's rise against major trad-ing currencies. Sales by volume. were barely changed from the first quarter of 1986; he hadd -

June 24 to raise authorized share

Revers LEVERKUSEN, West Germa-y — Bayer AG reported Wednes-ay that group meter profit in the authorization authorization would allow the company to react immediately to finanterms, first-quarter 1987 sales in needs and changing capital Western Europe were barely changed against the same period last year, Business in North Amerimarket conditions in the next five

Mr. Weitkemper said 400 million ca declined 19 percent to 1.8 billion DM of the new authorized capital DM and Latin American sales fell was destined for rights issues and 26 200 million DM for acquisitions The chairman said Bayer had reached agreement in principle to sell its U.S. subsidiary, Helena and new listings of Bayer shares on foreign stock exchanges. The stock Chemical Co., to an international market listing in Tokyo planned for trading company. He gave no de-tails on the buyer or the price.

23% of Chinese Firms Had Losses in Quarter

The Associated Press

the company did not fit into Bay-BELIING - Twenty-three perer's strategy because only 5 percent cent of China's state-owned indusof its revenue was achieved with products from the Bayer group.

trial concerns were unprofitable in the first quarter of 1987, the China Daily said Wednesday. It said the combined losses were Mr. Strenger said accounting procedures for first-quarter figures were altered to comply with new \$410 million, 42 percent over the accounting legislation and 1986 fig-year-earlier period. The paper said ures had been adjusted to make the anosher of state enterprises re- comparisons. He did not detail the porting losses rose by 933 to reach effect of the changes on profit and

US International Tax Manager

Frankfurt

A key position has arisen within our Frankfurt office, where the scope and variety of the taxation work undertaken creates an outstanding career opportunity,

As the volume of our business increases, so does the importance of recruiting high calibre people into our organisation. We are seeking a person who will already have gained a management position in a major tax consultancy. environment

You'll have good public practice experience in both expatriate and corporate tax, and the presence to handle a high profile management role. CPA qualification is essential, and you should have the potential to develop the Frankfurt practice and actively contribute to the firm's growth. German language capability, or a strong desire to learn the language, is necessary.

The rewards are excellent, with a very attractive salary package.

If you have the experience and ambition that we are looking for, we'd be

Director European Operations Computer Products

Paris based

The company concerned, privately held, is quoted by industry analysts as a leading force among US High Tech firms, combining high investment in R and D with record prolitability. It is expected to increase its revenue base in Europe Itom \$75 million to \$50%0 million within the next two

The firm is offering a challenging opportunity for a manager with a proven track record in Sales Mark eting of micro-computer products in

The post will involve responsibility for management of European HQ, 3 European subsidiaries distributors and OEM's in 12 countries and the initial stages of an assembly rest facility

Suitable candidates should possess a combination of exceptional Sales-manship, entrepreneuroal skills and sound business judgment. We are particularly looking for above average capacities in terms of initiative

The position offers an attractive compensation package.

Applications which will be treated with absolute confidence, should be sent to

Selected Data

As a consequence of the Bank's conversion into a KGaA and listing on the stock exchange. new dimensions have opened up for our future business development. A DM 100 million convertible bond issue floated in December was (avorably received by investors, thus forming the basis for strengthening our long-term lending capacitiy. Ongoing press coverage and daily quotations of our shares support our intensive efforts to gain new commerical, institutional, and individual clients.

Capital resources rose from DM 219 million to DM 252.5 million. Record results were achieved in 1986. The balance sheet total remained virtually unchanged, whereas assets under management increased from DM 13.2 billion to DM 14.9 billion. Securities trading rose by 70%. Substantial progress was also achieved in underwriting, with three issues under our lead management for the first time.

Strong results were recorded in our own securities and foreign exchange trading. The partial operating profit was up 10.7%. Net commissions rose by 23.4% and nearly reached the level of net interest income, which increased by 5.1%. Total staff expanded from 662 to 723.

The Bank's shareholders will directly benefit from the improved results. The General Partners have proposed that the dividend be raised from DM 8 to DM 9 per nominal DM 50 share, thereby increasing the dividend payout from EM 14.0 million to 16.2 million. Distributable profit amounted to DM 24.9 million compared with DM 22.7 million the previous year.

CURRENCY MARKETS

U.K. Auctions Its First Bonds

Renters

nique, held its first auction of British government bonds Wednesday

in an effort to speed sales and limit the impact of market volatility.

LONDON - The Bank of England, using a U.S. Treasury tech-

In a shift from its traditional sales at a fixed price or in varied-

amounts at market levels, the bank auctioned £1 billion (\$1.67 billion)

Dealers said the auction allows the central bank to put more-

pressure on major dealers to buy a new bond issue, since the bank

allows them special privileges in day-to-day market trading. The bank is expected to sell up to £15 billioo of boods this year, and

hold two to three auctions for as much as £1.5 billioo each. Dealers

said that at Wednesday's auction of 8 percent boods, a major portion

sold at better-than-expected prices ranging from 98.25 to 98.75 oo a

THREW ME IN THE SLAMMER FOR DISTURBIN' THE PEACE. JUMBLE THAT SCRAMBLED WORD GAME

HERE'S A PICTURE OF A

GARFIELD

UKAY COIE, I HEARD YOU POGS

BOOKS

company finally got straightened out, Sid Bass STORMING THE MAGIC KINGand his brothers, who had also bought heavily DOM: Wall Street, the Raiders, and into the stock, ended up with a capital gain of S850 million. the Battle for Disney By John Taylor. Illustrated. 261 pages.

Actually, the story told in "Storming the Magic Kingdom" is far more complicated, what with the many factions vying for power in the company and the variety of strategies used to fight off hostile acquisition. But Taylor, a senior writer for Manhattan Inc. magazne, down a willed year unique to the forma all \$18.95 Alfred A. Knopf, 201 East 50th does a skilled varu spinner's job of keeping all the threads untangled.

True, he has going for him a story as arche-typal as "The Three Little Figs." On one side were the wolves, the creatures who occupied what Taylor calls "the tiny, incestuous world of takeover mercenaries; men, by and large, at a handful of investment banks, law firms, and public relations agencies, who were sometimes professional adversaries and at other times professional allies, depending on who retained

di.

them in any given battle." On the other side were the keepers of the magic kingdom, who, at least in their view, were nothing less than "a force shaping the imaginative life of children around the world."

Indeed, so naturally does Taylor's narrative unfold that it isn't until near the end that a reader pauses to ask what the deeper point of it all might be. Almost immediately, the author supplies some possible answers. One of the most salient is that despite Wall Street's recent insider-trading scandal, most of the information that gets passed around to the profit of interested parties is perfectly legal. As Taylor concludes: "The battle for Disney anfolded in the manner it did, and assumed the outcome it finally did, because the arbs, brokers, bankers, and lawyers all knew one another. If they didn't all share the same values, they did speak the same language and employ the same frame of reference. They were all insiders,"

For critics of corporate raiders, Taylor suggests, the Disney story illustrates the vast amounts of time and money corporations are forced to waste defending themselves in useless takeover battles. In contrast, defenders of the raiders "have cited Steinberg's takeover at-tempt on Disney as an outstanding example of the useful role raiders play in identifying undesperforming companies and forcing changes which improve that performance."

Some readers will insist that the dubiousness of this latter argument is self-evident from Disney's having gone from producing "Snow White" and "Pinoochio" to putting out such recent films as "Down and Out in Beverly Hills" and "Ruthless People," Others, not so enamored with the classic Disney vision, will respond that the change is just as well.

Taylor bimself draws no final conclusions on this score. Nor does he really need to. He has dug up and toki a story that typifies what is happening in American business today. He has wrung high drama from the financial news, and in so doing has shown us a world we rarely get to see.

Christopher Lohmann-Haupt is on the staff of The New York Times.

Pirates Are Cashing In on Steadier Bonds

PITTSBURGH - Barry Bonds, a 22-year-old centerfielder and the son of a former major league star, has been highly touted since join-

BASEBALL ROUNDUP

ing Pittsburgh carly last season. Until the last 10 games, bowever, he had shown only flashes of brilliance.

But these days Bonds is Pittsburgh's brightest star. He has raised his average 63 points in two weeks, going from .212 to .275, and his three-run home run helped the Pirates rout San Diego, 12-5, here Tuesday night.

As a rookie last year, Bonds heard the comparisons to his father Bobby, to Eric Davis, to Darryl Straw-berry. The trouble, he said, was that he listened --- and wound up batting 223 and striking out 102 times.

Now he's showing signs that he can deliver on what Manager Jim Leyland calls "the kind of talent you don't see every day."

Bonds recently began extra bat-ting drills designed to make him more patient and to keep him from chasing bad pitches. On Tuesday he had three hits and scored four runs.

Winning pitcher Rick Reuschel apparently struck out to end the second inning but reached first when catcher Benito Santiago was unable to hold the 3-2 pitch from Andy Hawkins. Bonds followed with a homer to straightaway center

that gave the Pirates a 4-2 lead. Cardinals 6, Giants 5: In San Francisco, Willie McGee's two-run home run helped rookie left-hander Joe Magrane win his third straight decision as St. Louis edged shead of Chicago and into first place in the National League East, Dodgers 7, Cubs 0: In Los Ange-

les Rick Honeycutt pitched his first shutout since he beat Houston, 1-0, on April 17, 1984.

Astros 5, Phillies 2: In Houston, Jose Cruz doubled home two runs to highlight a four-run first that helped the Astros end a three-game losing streak.

Braves 5. Expos 2: In Montreal. pitcher Zane Smith hit a three-run double and registered his fourth

straight victory. Mets 6, Reds 2: In Cincinnati, rookie David Cone threw a fourhitter for his first major-league victory as New York snapped a fourgame losing streak. Cone's complete game was the fourth of the year for a staff that notched 27 last season.

Orioles 10, Twins 7: In the American League, in Baltimore, Fred Lynn hit a bases-loaded home run in the eighth to forge a 7-7 the and Larry Sheets ended the game in the ninth with a pinch-hit, three-run shot, in a 14-year career with Boston, California and the Orioles, Lynn is batting 328 with 33 homers and 111 RBIs in 129 games against Minnesota. "It really doesn't matter who they have over there," he said. "I've faced guys I've never seen be-

NORFOLK, Virginia - Dwight Gooden

couldn't skep much Monday night, thinking about Tuesday night's game against the Richmond Braves. The great New York Met right-hander, in

his first game since undergoing 28 days of cocaine rchabilitation, wasn't worried about facing Trench

Davis, Bean Stringfellow or any of their Interna-

It was the crowd he couldn't get off his mind. "I was hoping I wouldn't get booed," said the 22-year-old. "I didn't know how they would react to

me. I knew it would be a home crowd, but you

never know until you go out there. I haven't heard cheers in a long time. They felt good."

The seliout Tidewater Met crowd of 6,128

cheered when Gooden walked onto the field half

as Texas spoiled Steve Carlton's Red Sox 3, Mariners 2: In Bos- first start for the Indians. Tigers 15, Angels 2: In Detroit, to, rookie Bill Pecota went 4-for-4, Gardner pitched out of seventh- Darnell Coles ended a 4-for-64 including a bases-empty homer, as and eight-inning jams, and left slump with a two-run homer and a

an hour before game time. It gave him a standing ovation as he took the mound. And it rooted for all

39 of his pitches (24 for strikes) as he worked three

shutout innings, permitting only one misjudged-

winner was not the strikeout master who earned

the nickname Dr. K in Shea' Stadium. He threw

only six curveballs and never got a change-up over the plate. Only one Brave struck out and few of the

dozen hitters looked overpowered, even in twilight

conditions. But the radar gun clocked his fastball

at 95 mph (153 kph) twice in the second inning. By the third, he'd failen into the 80s, although his last

and-in drop that the left-handed hitter looked like

he was trying to put out a flaming rug with a bat. Said Dave Pavlick, the Mets' roving minor-

It was Gooden's first positive experience in

some time. He lost twice in the 1986 World Series

and missed the victory parade the day after the Mets became world champions. In the offseason

he was arrested and beaten during a confrontation

with hometown police in Tampa, Florida. He end-

But Tuesday evening, warm and cloudless, was

as simple and pristine as a scene from "The Natu-

ral." Tidewater's first sellout crowd since opening day even implored Manager Mike Cubbage to let

Gooden bat after his prescribed three innings of

work were finished. Gooden did - and struck out,

grinning sheepishly. The only other time he smiled

was after he bounced an easy throw to first base-

For this Triple-A town, Gooden's appearance

was a special occasion. More than 100 members of

the national media used a press box with one

phone. Fans bought every ticket within five hours

after they went on sale Monday at 9:30 A.M. The

first fan in line had been there since Sunday night.

for 40 minutes," said Tidewater's general manager,

Dave Rosenfield. "Thank goodness Gary Hart didn't quit today or nobody would be here."

face Dwight Gooden again," said Richmond's manager, Roy Majtyka, meaning they'd never make the majors. "For some of them, it could be the highlight of their career."

Cubbage came to the ballpark early, got out a

lineup card and carefully wrote Gooden's name in

the No. 9 slot before he'd written any other name.

"Damn, that looks good," he said.

"Some of these guys on my team will never get to

disposing of the Golden State War-riors, 118-106, capturing the bestof-seven series in five games. Meanwhile, Houston downed Seattle to draw to within 3-2 in the

other conference semifinal. There have been no surprises." said guard Magic Johnson. "We are where we expected to be." Los Aneles got there with a balanced ofensive attack - James Worthy had 23 points, Johnson added 19 points and 13 assists, A.C. Green had 20

points and Michael Cooper 17. Guard Eric Floyd, who had 51 points in the Warriors' Game 4 victory, was held to 18 on 7-of-17 shooting as Cooper, honored before the game as the NBA's defensive player of the year, kept the clamps

we're going to just play basketball and be the silent assassins." Rockets 112, SuperSonics 107:

In Houston, Rodney McCray pulled down 10 rebounds to help the Rockets keep alive their hopes of a second straight conference litle. The winners' Akeem Olajuwon added 26 points.

Houston jumped in front in the first quarter and held a 59-38 lead with 5:25 left in the second quarter before Seattle shut off the Houston running game and pulled to within 66-56 at halftime.

"I thought we played well at the start, but Seattle wouldn't settle for that," said Bill Fitch, the Houston coach. "The McCray's individual effort was outstanding. The mistakes he made were from fatigue."

McCray played all but one minuse of the 48-minute game. "There's only one month left in the season," said McCray. "I'll get plenty of rest later."

Seattle out the deficit to 89-86 going into the fourth quarter and took its first lead, 97-96, on a 3pointer hy Tom Chambers with 7:11 in the game. But Olajuwon hit a basket with 4:15 left, and the Rockets never trailed again. (UPI, AP)

"Besides meeting the president and vice president, what else do I get for my money?"

"You will be personally briefed by a U.S. marine officer named North who knows about everything that takes place in Central America and any other hot spots in the world. He'll tell you which contras require bread, which ones are out of beans and who needs aspirin, We want our donors to know where every nickel is going." п

"If I contribute will I become part of what you're doing?" "You are a part of it now. Your

check makes you a benefactor in this war or any other war in the bemisphere." "Is there anything else my dona-tion entities me to?"

"If you would like to go down and kill some Sandinistas in the bush I can arrange it." "I'd rather have my money do

my talking for me. Say, are you really sure none of it is for guns?" "Would the president of the United States get involved with a foundation that is trafficking in

arms?"

varting.

"Maybe he doesn't know." "How can the president not know what is happening in his own White House?

I said, "Mr. Reagan doesn't know a lot of things. That's why he's such a good president."

"Did I tell you that your contribution is tax deductible?" "Why is it tax deductible?"

"We inform everyone the money is going for Kleenex and dog food. What we do after that is nobody's business." "That's fantastic. Put me down for \$5,000."

"Thank you, Here's a pass for the Oval Office. Just tell the president's side you made a contribution to our foundation and he'll usher you right through without

AMSTERDAM - Harry Mu-hisch lives and works in a comfortable apartment in the center of Amsterdam. At 60 he looks very much the successful author, rather than the 1960s personality who spoke for Amster-

dam's nonconformist crowd in books like "Report to the Rat King," "In Memory of Che Gue-vara," and "The Sexual Bulwark," a psychological study of Wilhelm Reich.

By Jonah Raskin

More than any other contemporary Dutch writer Harry Moisch has articulated the moods of several decades and several generations. He has had an uncanny ability to tell his readers how and what they are feeling before they themselves seem to know. And more than any other Dutch author Mulisch has an international reputation. In the United States he is best known for his 1982 novel "De Aanslag," which was translated into English as "The Assault," published by Pantheon

in 1985. "A cool brilliant modern hor-ror story," Mary McCarthy wrote. "Brilliant," John Updike

exclaimed. "Among the finest European fiction of our time," Elizabeth Hardwick declared.

Fons Rademaker's film of Mulisch's novel, the 1987 Oscar winper as the best foreign film of the year, has added to the author's reputation. But the accolades from Hollywood probably won't alter an anthor who is firmly set in

his ways. World War II is still the pivotal event in his experience. It is still the war and it continues to send tremors across the embattled landscape of his memory and imagination. In 1962 Mulisch covered the Eichmann trial in Israel and wrote about it in "Case 40/61." In the novel "The Stone-Bridal Bed" be mapped the con-

tinuing reverberations of World. War II on two men, a Dutch war criminal and an American pilot who participated in the bombing of Dresden, And in "The Future of Yesterday" be offered a frightening picture of what might have happened if Germany had won World War II.

worked with anti-fascist organizations. My father was a prominent banker who collaborated with the "The great difficulty in writing Nazis. My mother's Jewish friends had to wear the yellow about the war is that in the same measure that you reveal it, you

Harry Mulisch's Assault on World War II

hide it," Mulisch said. "Because to know the essential thing about Mulisch's parents separated, then divorced, and his mother the war it is essential that you know noshing about the war. Tomoved to the United States, evenday we can read the history books watch the films, learn the tually settling in San Francisco. Mulisch visits her often. facts. But at the same time we know far less because the main Mulisch's father, a stern discithing about being in the war was

plinarian, was his sole parent durthat we knew nothing. We lis-tened to German radio but we ing World War II, a period the author remembers now with both horror and nostalgia. The mili-tary curlew meant that no one couldn't believe it. We heard rumors that the Allies had landed but we couldn't be sure they were was allowed in the streets after true. We read the anderground dusk or before dawa. During the newspapers issued by the Resis-tance and we wanted to believe day it was too dangerous to go out, or to attend school." Too they were true, but we couldn't be young to be drafted into the army, certain about their reports eiand not old enough to be accepted by the Resistance, Mulisch stayed at home reading adventure

Harry Mulisch was born in novels and thumbing through 1927 and grew up in Haarlem. "It was only much later on when I American magazines. began to tell people about my

"German radio told us that" America Awas ruled by thugs and gangsters," Mulisch said. "How wonderful I thought! I wanted to "My mother was lewish and be a gangster! In those days evcrything was simpler. The United States could do no wrong, America was heaven. Germany was hell sinated by the Resistance. Mu-Fulbr. The Americans were the good lisch shows how World War II. gium.

star. My father's associates wore guys, the Germans the bad guys." the swastika of the Third Reich." When Holland was liberated. When Holland was liberated, Mulisch's father was jailed as a Nazi collaborator. "I visited my father every few weeks, and we maintained contact, but the war was a personal liberation for me, aberation from my father,"

> Mulisch moved from Haariem to Amsterdam, and began to write poetry and short stories. And yet for all the distance he put between himself and his father, Mulisch still seems to be emotionally linked to him. Mulisch has only to peer out the rear window of his . iving room to see the prison where his father was incarcerated in 1945.

> The antobiographical element adds a compelling dimension to his fiction, especially to "The As-ssult," where the relationship between fathers and sons, older men

ton's father is murdered by the Nazis. Fake's father Ploeg, the assaults Anton, how it stalks him and how he finally comes to terms with it and exorcizes its ghosts. "The Assault" is by far Mulisch's most popular nevel. In the Netherlands alone it has sold more than 350,000 copies. Though he intended no message, Mulisch stirred up painful memories. "Perhaps if we remember the atrocities of the past we may not be condemned to repeat them," he said.

In the rest of Europe, too, the book has been widely read in the East and the West, highly regarded in both Pragne and in Paris.

Mulisch has not rested on his laurels. He has published two more novels -- "The Comeback," about the return to the stage by an old actor, and "The Pupil," in which he again makes dramatic use of World War II. For all his concern with the

past, Harry Mulisch is remarkably preoccupied with the future, with human survival in the wake of destructive technology.

In "The Assault" Mulisch describes a man who seems to "step out of another century." The main character observes him carefully:

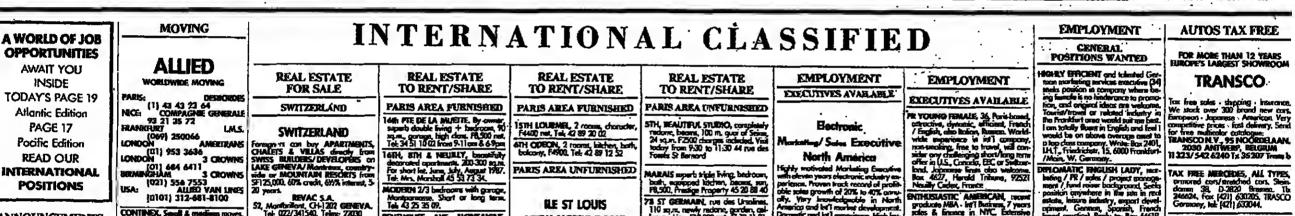

"The man had one end of a pole several yards long attached to his waist, while the other end was fastened to the prow of a barge. Walking with heavy steps, he. pushed against the pole and thus moved the boat through the water. At other times the man remained on deck and walked forward along the side of the barge, dragging the pole behind him through the water. When he reached the bow, he planted the stick sideways in the bottom of the canal, grasped it firmly, and walked backwards, so that he

poshed the boat forward beneath his feet. This specially pleased Anton: a man walking backwards to push something forward, while staying in the same place him-

family that I began to realize how strange it was," Mulisch said.

PEOPLE

Congress Urged to Bar Coloring of Film Classics Woody Allen and other film artいたいがいらますがいという

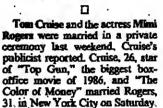

12

.

ists urged Congress on Tuesday to outlaw what they called mutilation of black-and-white movie classics by those who splash color on the familiar shades of Humphrey Bo-gart's dinner jacket and ingrid Bergman's teary cheeks. Allen joined the actress Ginger Rogers and the directors Sydney Pollack, Milos Forman and Elliott Silverstein in asking a Senate subcommittee to help protect American film artists. Their testimony came as part of their lobbying to extend copyright laws to govern what can be done with old movies.

The Benedictine monk Stanley L. Jaki, a Roman Catholic priest and professor at Seton Hall University in South Orange, New Jerscy, who was honored for his writings on science and faith with a . \$365,200 award, said he was able to say so much because for a decade he could not speak and had time to think and write. The Hungarianborn theologian and physics professor on Tuesday received the 15th Templeton Prize for Progress in Religion at a ceremony in London. Jaki lost his voice in a surgical mishap in 1953 and did not regain it until about 10 years later.

. - 🗖 Frank Sinatra has canceled a June 8 concert in Sweden after he was denied a tax exemption because he performed in South Afri-ca, Swedish television reported. The singer would not be exempted from the 30 percent "artists' tax" because be is on a so-called United Nations "blacklist" for performing in South Africa in 1981 and 1983, according to the report.

Arthur Ochs Subberger, chair-man and chief executive officer of The New York Times Co. and publisher of The New York Times, was elected chairman of the Metropolitan Museum of Art, succeeding J. Richardson Dilworth, who resigned
